

A Unified Democratic Government without different political parties!
A Real Democratic Government for the People by the People!

If South Africa were to follow this style of governing the people of South Africa through the apparatus of the state, then we will emerge centre stage, top of the charts, in the amphitheatre of the world. The land of South Africa is likened to a beautiful and warmly furnished **House**. The Western Cape with the beautiful Cape Town as its capital is the **Entrance Portal**. The Eastern Cape with the friendly city of Port Elizabeth as its capital is the **Living Room**. The always sunny Northern Cape is the **Sun Porch** in front of the Living Room. The flat grasslands of the Orange Free State is the **Dining Room**. Gauteng, the industrial hub of South Africa is the **Kitchen** of our house. The beautiful province of Mpumalanga is the **Main Bedroom**. Northwest Province with its inland beach resort at Sun City is the **Children's Bedroom**. The Limpopo Province with the border crossing at Beitbridge giving access to our neighbours from the North, is the **Guest Bedroom**. Natal, where the water of the Indian Ocean is warm all year round and where the highest waterfall in the World is plunging off the Drakensberg amid a gigantic amphitheatre, fit to serve as a shower cubicle for a giant, is our **Bathroom**. But where is our toilet? In the middle of SA is a big black hole on the map, called Lesotho. That mean we have no flushing toilet, just a deep **Longdrop**. But at least we have one!

The one word that sums up all of South Africa's problems and the reasons why our problems are not solved.

All the problems of South Africa can be summed up in one word. It starts with the letter M. It is not a person. It is **MONEY**. South Africa has a money problem, and it runs like a rotten thread through all our problems. It should therefore also run like a golden thread through the solutions for all the diverse problems of South Africa. Money is also the only subject that unites everyone in South Africa. Everyone can do with more money. Nobody has a bank account that is full. The unifying value of the people of South Africa has always been the desire to make a good living in peace. Peace and prosperity in other words. Peace and prosperity needs political unity and the right government plans and policies to create the platform for ordinary citizens to capitalise on the opportunities in the South African economy or the company called the South African business landscape which is wherever the Rand is being used as a currency of exchange. The people of South must produce products that can be exchange for money to create wealth for themselves and their fellow citizens. Money is just a road or means to transport or exchange wealth which is locked up in products like labour, a physical product you can hold in your hand and eat, dress in, drive in, use to make your life better, more comfortable, give you enjoyment/fun etc. But let's first look at the major problems of South Africa.

1. One third of the South African population is unemployed and among the youth the number is even much bigger. South Africa has had the highest percentage unemployment in the world for the past 20 years and this number has risen steadily since it started increasing 25 years ago and shows no sign of changing direction as things are currently being done. **Unemployment** is a MONEY problem.
2. Because of all this unemployment and lack of economic growth there is much poverty in South Africa, as can be the best seen in the living conditions of so many South Africans in the townships. **Poverty** is a MONEY problem.
3. Because some people earn no money, because of unemployment and others earn money in the shape of varying size salaries, there is consequently much inequality in South Africa. **Inequality** is a MONEY problem.
4. South Africa has a serious problem with crime, to the extent that the police, judiciary system and prisons are overwhelmed. There are about 1 million arrests made by the police annually but only 30 thousand criminals or 3 percent are being convicted and locked up by the state. There are 167 thousand prisoners in jails in South Africa while the prisons are designed to house only 100 thousand prisoners. This means there is severe overcrowding in some prisons. Prisoners are also not being rehabilitated. These very lawless and in many cases violent men are locked up together in too great numbers and they therefore violently and immorally target one another resulting in a very dangerous and lawless environment. Most crime, even violent crime, in South Africa is driven by **smuggling illegal substance, theft or corruption** in the **private sector** or the **state**. These are all MONEY motivated actions.
5. There is a lot of infrastructure related problems in local municipalities that do not supply basic services up to the right standard, due to people that get good salaries but are then guilty of mismanagement of funds, laziness, corruption and lack of skills. **Poor Local government service delivery** therefore also revolves around MONEY.

The only reason why these problems are not being resolved, but rather worsen, is because the parties in charge of the government are not doing their work, which is to address all these issues. They have one third of all the money in circulation thanks to taxes. They make all the laws and can enforce them with the police. Their position gives them all influence. They have been in power for more than 30 years and still too many South Africans suffer because there is not enough money to live on. **Why are these parties still ruling South Africa?** Ask the **VOTERS** of South Africa.

Proverbs 31

The Words of King Lemuel

¹The words of King Lemuel. An oracle that his mother taught him:

²What are you doing, my son? What are you doing, son of my womb?
What are you doing, son of my vows?

³Do not give your strength to women,
your ways to those who destroy kings.

⁴It is not for kings, O Lemuel,
it is not for kings to drink wine,
or for rulers to take strong drink,

⁵lest they drink and forget what has been decreed
and pervert the rights of all the afflicted.

⁶Give strong drink to the one who is perishing,
and wine to those in bitter distress;

⁷let them drink and forget their poverty
and remember their misery no more.

⁸Open your mouth for the **mute**,
for the rights of all who are **destitute**.

⁹Open your mouth, **judge righteously**,
defend the rights of the **poor** and **needy**.

The leaders of a country is not supposed to make it their primary task to rule for their own pleasure. This is a warning against corrupt gain to use as a way to pay for pleasure. The danger when you are the highest authority is that you are not being held accountable to nobody and then you use your power for your own benefit and not for the benefit of those you rule over. Your time during your term should primarily be spend on state matters, namely improving the livelihoods of the destitute, poor, needy and the ones who cannot speak for themselves (mute) because they lack the power and influence and not on your own private and personal gain like so many leaders have tended to do in the past.

Proverbs 28 ¹⁵Like a roaring lion or a charging bear is a wicked ruler over a poor people.

(This ancient wisdom reiterates that the quality of a government determines the welfare of a nation)

Ecclesiastes 10 ¹⁶Woe to you, O land, when your king is a child, *(lack training and experience and are incompetent)* and your princes feast in the morning!*(irresponsible and selfish)* ¹⁷Happy are you, O land, when your king is the son of the nobility, *(are capable people with experience of handling power and money)* and your princes feast at the proper time, for strength, and not for drunkenness! *(are responsible and noble people with honour and dignity who prioritises the interests of their subjects)*

Reverend Kenneth Meshoe is an honourable man who has dedicated his life selflessly to the improvement of the lives of other people before he went into politics. He is the type of man that deserve the vote of all South African Christian voters as he can express his thoughts very eloquently and is therefore a very capable leader who can influence citizens for the better. In the rest of this document, we in the **South African Christian Democratic Company** spells out the solutions we have to all the problems of South Africa. Why not vote for us for a change to change the circumstances of millions of people for the better? Please tell us the solutions of the opposition!

M&M

Melt in your **Mouth**,
not in your **hand**.

Use the state's money
sparingly, appropriately and where it is needed to
benefit the needy and the economy and not yourself.

Job 29¹⁶ I was a father to
the needy, and I searched
out the cause of him
whom I did not know.

A clever king makes use of
many advisers for advice.

fragile
Handle with care

Proverbs 28² When a land transgresses, it has
many rulers, but with a man of **understanding**
and **knowledge**, its stability will long continue.
Proverbs 29⁴ By justice a king builds up the land,
but he who exacts gifts tears it down.

Van die **Hand** na die **Mond** val die pap op die **grond**.
Do not waste the state's money. Handle it with great care.

Nkosi Sikelel' iAfrika

God Bless Africa. Raise high Her glory.
Hear our Prayers. God bless us, we, her children.
God protect our nation. End all wars and tribulations.
Protect us, protect our nation.
Our nation South Africa – South Africa

It is Time for Africa

Minister of Intelligence and his Deputy

C.P. van der Merwe (Minister of Intelligence)

C.P. v.d. Merwe (Dep Min of Intelligence)

Have one vote in the cabinet like all ministers.

The Ministry of Intelligence will be responsible for
improving the efficiency of the state through
innovative **technical solutions** both in the macro- and
microscopic domains with the help of eleven advisors.

The Minister of Finances and his Deputy

1. **Geordin Gwyn Hil-Lewis** of the DA
2. **Ashor Sarupen** of the DA

The giant **Geordin & Ashor** must defeat is the
poor triplet of unemployment, economic
stagnation and poverty through the efficient
use of state finances & tax. They will allocate
funds to the sixteen different ministries and
monitor how it is spent throughout the state.

The Prime Minister and his Reserve

1. **Mmusi Maimane** of One SA
2. **Kennith Moshe** of the ACDC

Mm will be the conductor of the 18 different
ministries and will oversee their management
and be the nation's father. He is the state's
spokesman to the nation. **KM** will be the
government's spokesman in church and **Mm's**
reserve. Citizens will contact **Mm** with the **SS**.

The Minister of Human Resources and her Deputy

1. **Makosi Khoza** formerly of the ANC
2. **Patricia De Lille** of Good

MK and **Patricia** will head the government's human
resource department and anti-corruption unit in joint
venture with the National Prosecution Authority and the
Hawks who would report to them directly. They will get rid
of corruption in the state. They will keep the state's
employees motivated, inspired and paid.

**We are Growing
Higher and Higher
Diverse People Unite
Eendrag Maak Mag
Strength in unity**

Basic layout of the Government and the plans it should implement to solve the macroscopic problems of South Africa.

Hearts (Governing and Nation Building)

Ace – A plan by the **Minister of Intelligence** to unite all the best current political leaders in South Africa into one simple but very efficient democratic government to rule South Africa better than any country in the world.

King – *The Prime Minister*

Queen – *Minister of Human Resources*

Jack – *The Minister of Basic Education*

Ten – *The Minister Local Governance*

Nine – *The Minister of Health*

Eight – *Minister of Sport/Art/Culture*

Seven – A plan for the **Minister of Human Resources** to inspire all the Government Employees to be proud to be in government and do their work ethically and with enthusiasm in a precise and organised fashion.

Six – A comprehensive plan for the **Minister of Basic Education** to drastically improve the marks of pupils who are underperforming by evaluating and paying the teachers on the results of their pupils in relationship with their inherent potential.

Five – A simple plan for the **Minister of Local Governance** to fix the bad service delivery in cities and towns.

Four – A plan for the **Minister of Sport** to help South Africa win the Soccer World Cup within the next 15 years.

Diamonds (Economy and finances)

Ace – A quick plan for the **Prime Minister** to jumpstart the economy to create more employment, by **uniting** the population of South Africa behind the government to **support local products**. The **demand** for more local products will lead to **producing** more local products.

King – *The Minister of Finance*

Queen – *Min of State-owned Enterprises*

Jack – *The Minister of Foreign Affairs*

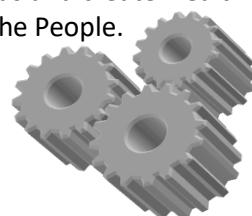

Ten – A plan for the **Minister of Finance**

to create wealth for the state through the creation of, investment in, and controlling of the value of our own two non-digital stable cryptocurrencies.

Nine – A plan to help the Minister of **State Owned Enterprises** to fix the South African Railways.

Eight – A plan to help the Minister of **Foreign Affairs** to promote South African tourism overseas through a book about South African Tourism, as well as a way to draw potential tourists to our tourism offices in capital cities of the First World.

Seven – A plan for the Minister of **State Owned Enterprises** to manufacture different types of commercial vehicles in newly designed, labour intensive production line factories, with Denel's expertise at its core to capitalize on the Ace of Diamonds and create wealth for the State and the People.

Clubs (Crime Fighting Matters)

Ace – A plan for the **Minister of Correctional Services** to ultimately eliminate crime in South Africa by **rehabilitating** criminals quickly, cheaply and in a most excellent way.

King – *Minister of Correctional Services*

Queen – *The Minister of Police*

Jack – *The Minister of Justice*

Ten – A Plan for the **Minister of Defence**

to use the **Army** to build 49 400 new single cell prisons in one year to start rehabilitating existing prisoners. This plan will cost about R500 million to accomplish and will require 228 troops.

Nine – A simple plan for the **Minister of Police** to give a monetary reward to citizens who report criminals that are eventually found guilty in court to help the police make more arrests. At the heart of this plan is changes to the unnecessary procedures that make it too difficult for police to arrest criminals.

Eight – A plan for the **Minister of Police** to give an amnesty period for murder to force uncaught murderers to surrender themselves to the police.

Seven – A perfect plan for the **Minister of Justice** to process criminals through the judicial system very quickly without any wrong judgements.

Spades (Work related Matters)

Ace – The basis upon which employees are appointed, promoted and monetarily rewarded inside any organization in South Africa.

King – *Minister of Urban Employment*

Queen – *Minister of the SA Army*

Jack – *Minister of Public Works*

Ten – *Minister of Agri/Fish/Rural devel.*

Nine – *Minister of Higher Education*

Eight – A Plan for the **Minister of Urban Employment** to improve or heal the relationship between the employer and employee with shop stewards that visit the workplace with fresh ideas to help workers improve their salaries, productivity and general psychological happiness and informing employers how to be better leaders and bosses.

Seven – A plan for the **Minister of the SA Army** to use the **Army** to do tourism infrastructure development in the Drakensberg-, Eastern Cape-, Western Cape-, Cederberg and Mpumalanga Mountains and the Kruger National Park.

Six – A Plan for the **Minister of Public Works** to help her determine the best tender on any project in a very simplistic but accurate way as well as to give some credit to construction companies who support the Ace of Diamonds with their machinery + Choose which project to do.

Five – A plan for the **Minister of Agri/Rural Devel.** to use the chiefs to re-organize the former homelands into productive communal farms.

Four – Poor Economic Empowerment plan for the **Minister of Higher Ed.**

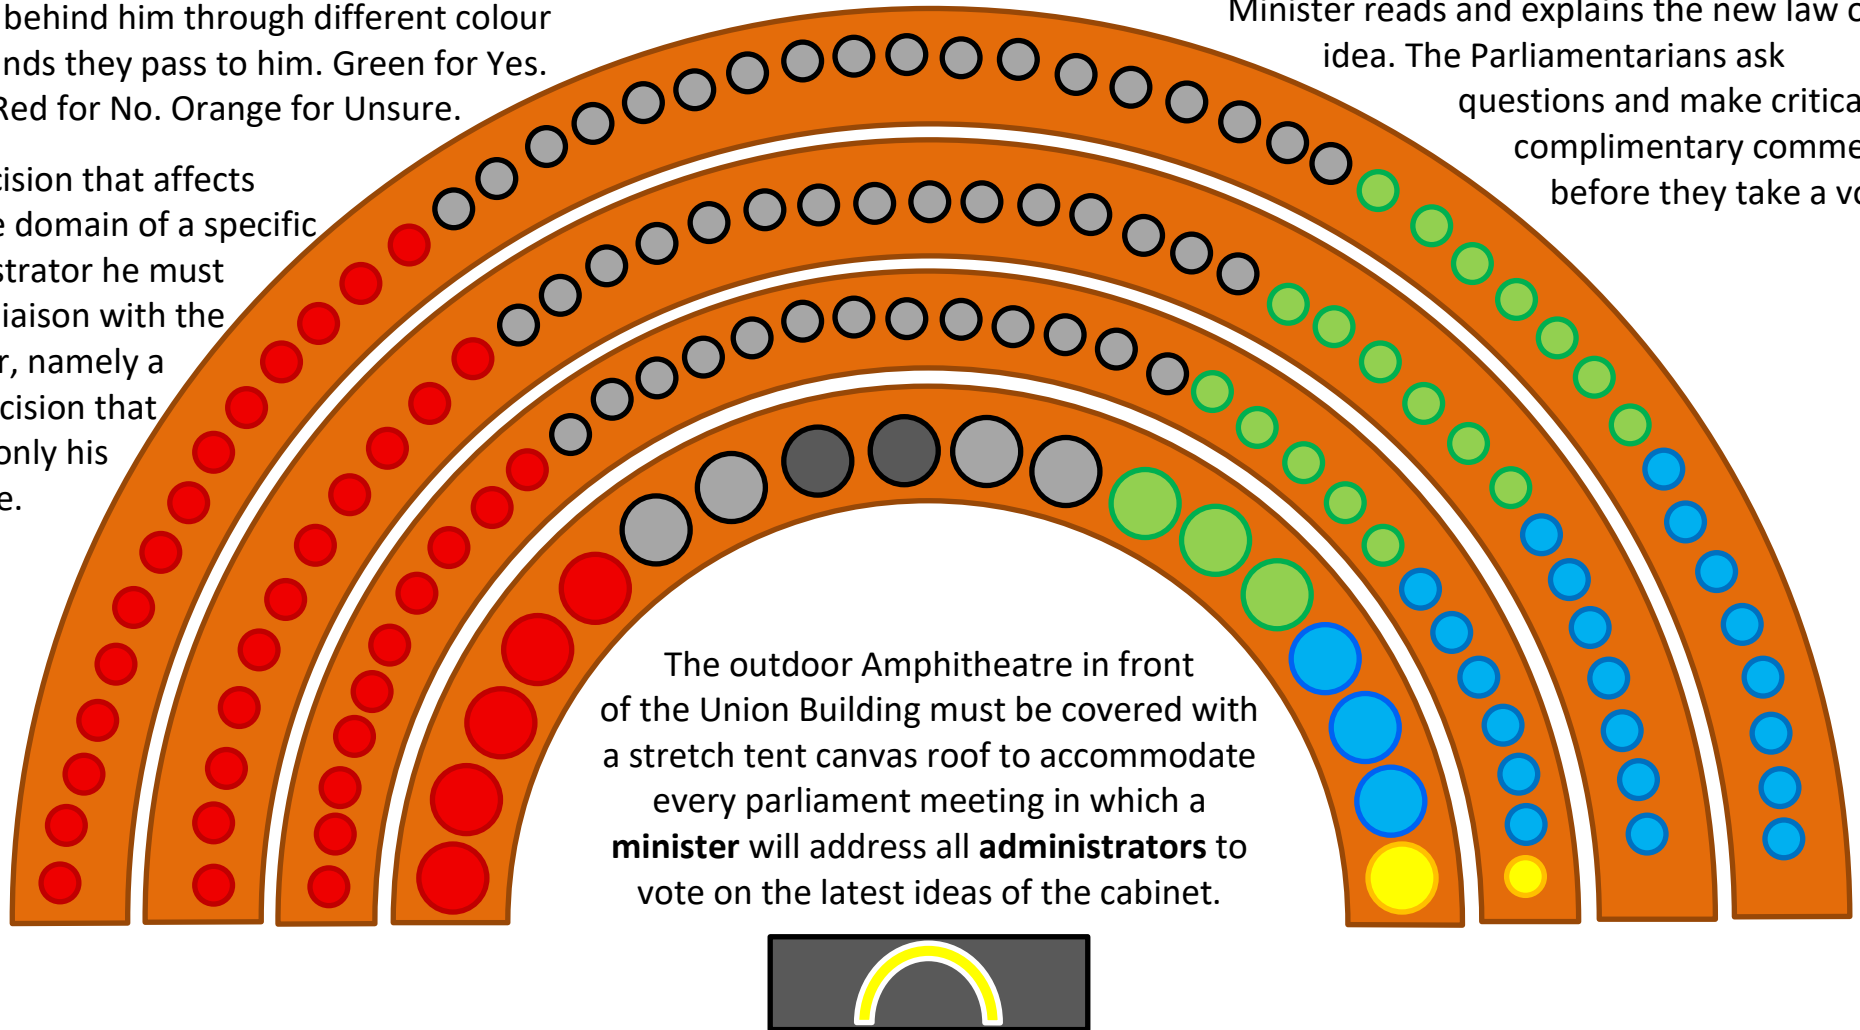

Ace of Hearts: Basic Layout of Parliament and its rules

The Ministers of the different departments sit in the front row, and their Administrators or Parliamentarian Voters sit behind them. Each minister counts the votes casted by his voters behind him through different colour armbands they pass to him. Green for Yes. Red for No. Orange for Unsure.

Any decision that affects how a whole department is being run must be taken through a cabinet vote that follows the same pattern as parliament.

Any decision the cabinet have taken that will affect all citizens of South Africa have to be vetoed by the Parliamentarians or Administrators. The relevant Departmental Minister reads and explains the new law or idea. The Parliamentarians ask questions and make critical or complimentary comments before they take a vote.

Any decision that affects only the domain of a specific Administrator he must take in liaison with the Minister, namely a local decision that affects only his province.

New Administrators are voted in by the Administrators after the relative Departmental Minister in which the new opening is has interviewed candidates and chosen 5. The Candidates apply by sending in their C.V. to the Prime Minister's Secret Service.

Seven of Hearts: A plan for the Minister of Human Resources to help her organise, orientate and inspire government officials.

<u>Payment of Government Officials:</u>	<u>Tax free salary/year</u>	<u>All Departments</u>	<u>Except: Basic Education</u>	<u>Public Works</u>	<u>Agriculture</u>
Deputy Administrators	R600 000				
Administrators	R1 000 000	Blue VW Polo	Red Toyota Carolla Cross	Red Isuzu X-Rider	Red Mahindra Karoo
The Fourteen Deputy Ministers	R1 500 000	White Ford Everest/white rims	All vehicles are made in South Africa. This is in line with the Ace of Diamonds. Everyone is responsible for own service/tyres/petrol except the Departments of UA/BE/PW/AG get a petrol card to travel daily.		
The Fourteen Ministers	R2 000 000	White Ford Everest/white rims			
The Two Deputy Prime Ministers	R2 500 000	White BMW X3 & Black Rims			
The Three Prime Ministers	R3 000 000	White BMW X3 & Black Rims	All Administrators get R30 000/month housing allowance. All Ministers get R40 000/month housing allowance. Everyone should live in his/her own house and take care of it personally.		
Deputy Minister of Intelligence	R3 500 000	White Mercedes C Yellow rims			
Minister of Intelligence	R4 000 000	White Mercedes C Yellow rims			

Work Uniform of Ministers and Deputy Ministers

Write white department NAME below the emblem.

Khaki Skirt and Pants
& Brown Shoes & Socks

Adm. Caps

Nkosi Sikelel' iAfrika

Lord bless Africa.

Raise high Her glory.

Hear our prayers.

Lord bless us, we her children.

The National Anthem should only be **Nkosi Sikelel' iAfrika** and should only be sung in our national language English so that everyone will understand the meaning of the words. A prayer without knowing the meaning of the words is no prayer at all. The British always sang "God save the Queen" and just look how well Queen Elizabeth aged.

Handkerchief

The meaning of the Flag's colours

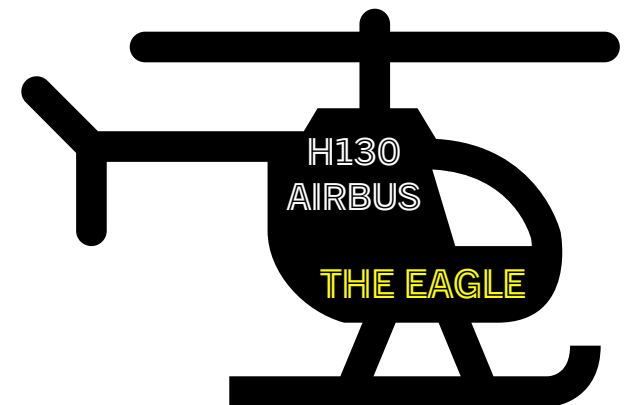

Black Pyramid – The 3 Prime Ministers & Ace Spades
Yellow Sun Rays – Department of Intelligence
Green Paths – The Citizens and Money of S.A. uniting
Two White Lines – The Ministers and S.A. Laws
The Blue Sky – The Administrators that have authority over the people working in the State.
The Red Soil – The People working in the State.

HELICOPTER LANDING SPOT

HELICOPTER SA

Three of Hearts: A plan for the HR Minister to get the SA cabinet one Helicopter to get to projects quicker and easier from the Union Building.

Two of Hearts: A simple plan for the cabinet on how to add more provinces in the form of neighbouring countries to the South African Government Franchise once the South African government is firing on all its cylinders. This will help both countries get more tourists because there is more to market. This will also benefit both countries through free trade in the same way as all members of the European Union benefits from the unity of the European Union.

**Lesotho and South Africa uniting Arial Aviation Celebration, to form United South Africa,
with Lesotho becoming the tenth province and
the new flushing toilet instead of the long drop of South Africa.**

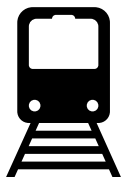

Nine of Diamonds: A plan for the **Minister of State-owned Enterprises** to solve the problems at **SA Railways**.

The demise of South African Railways started after the government started to change a winning recipe. The old steam trains were built and repaired in South Africa and ran on South African fuel, coal. The coal was put on a railcar behind the steam train. The running cost of coal generated energy is much less than the diesel generated energy that was used by the railway engines that replaced the sexy and beautiful old steam engines. This is evident by the fact that Eskom generates electricity by diesel for R6000 per MWh which is 10 to 12 times more than the coal fired power stations. Diesel locomotives were imported, cost more, broke more and had a shorter lifespan than Steam trains. The whole industrial revolution was driven by the success of the steam engine and countries like the USA developed greatly as a result. Why was steam trains not good enough anymore? Because they were old technology and that's the only reason. Who is the idiot that made this decision? Then they decided to replace the diesel locomotives again with electric trains that ran on electricity made at coal fired power stations because they can run on cheaper fuel. Why didn't they just go back to the steam train? The only problem is all this electricity had to be transported all over this vast railway network in cables that ran above the trains creating a second set of infrastructure above the train tracks that also needed maintenance. It is far easier to transport the coal along the railway line in a train that travels along it in any case, than to bring the electricity in from the power station. Then came loadshedding. There is way too much liberalism and way too few conservatism in the field of mechanical and electronic engineering. This is not the case in Civil engineering. If something is strong enough or good enough than its perfect. Anything more or less is an overdesign or an under design. A steam train is the perfect engine to pull a train in South Africa. Transnet can build them and they can run on raw South African fuel and fall in line with the **Ace of Diamonds** that will boost the South African Economy.

Expensive Fuel Cost/km
Expensive to Maintain roads

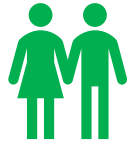

Trucks can never compete with trains over long distances.
Trucks damage the road and endanger motorists' lives.

Always use the South African Railways for long trips, because The Iron Coat is:

Fun

Romantic

Safe

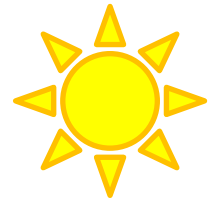

Fast

Cheap

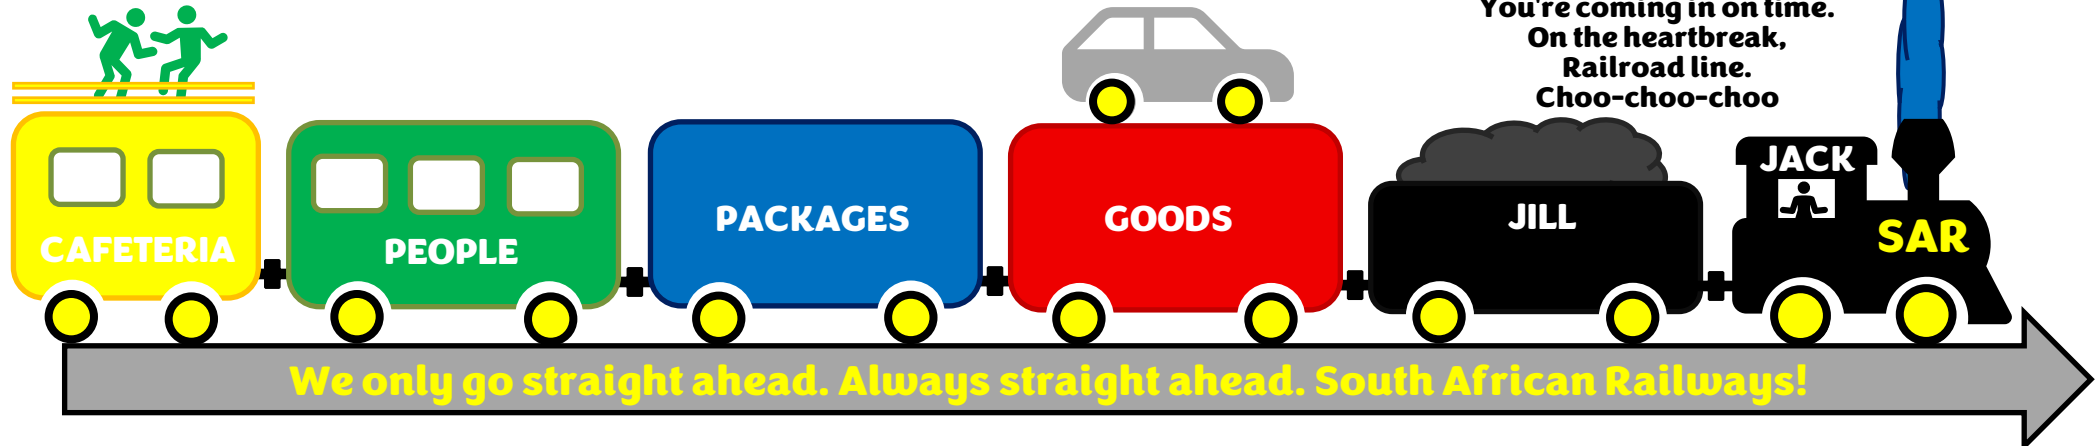

Blue steam flying from the Black
choo choo.
Wheels a-whining the lonesome
blues.

Oh Black train.

You're coming in on time.
Black train.

You're coming in on time.
On the heartbreak,
Railroad line.
Choo-choo-choo

It's very important that heavy long haulage is done by rail to protect the road network. The problem with electric trains is they require infrastructure below the train (tracks) and above the train (electric cables) that both need maintenance. If diesel is a viable means of heavy load transportation on the road, then it should also be on the train track. SAR must get back on track!

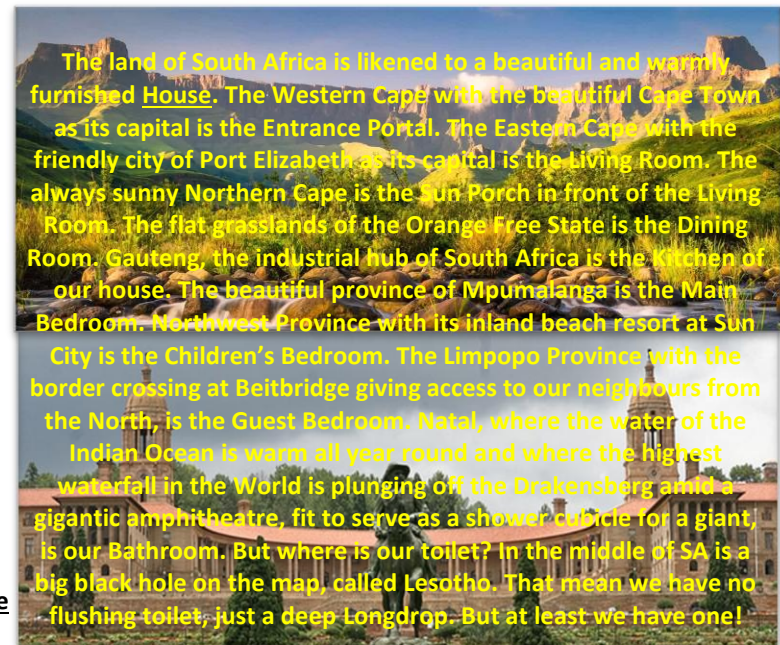

Today filling trains with water is much easier than in the old days, because there are water pumps today and the train does not have to park under an overhead water tower. The coal can also be loaded onto the JILL at the stations by means of a big, tracked loader from a heap that gets dumped there by a train that must travel past the station in any case. The train can generate its own electricity from the spinning axels and then power a conveyor belt at the bottom of the JILL to feed the burning chamber of coal in the locomotive. The coal can glide of a metal shoot into this chamber so that the train driver does not have to load the coal with a spade like in the old days. Today the smoke can be purified from soot and carbon with modern technology unlike in the old days where trains polluted a lot. The Smartie Steam Trains of South Africa will also draw many tourists from overseas who will find these trains much more fun and romantic then their boring and dangerous speed trains from which one cannot observe the countryside through which the train travels. Steam trains are perfect for passengers

Eight of Diamonds: A plan to help the **Minister of Foreign Affairs** to promote **South African Tourism** overseas.

Cover Page with a statue of old President Nelson Mandela displayed on top of the mountain like the statue of Jesus on Sugar Loaf Mountain in Rio de Janeiro. If overseas tourists to Cape Town asks, "But where is Mandela, we don't see him on top of the mountain." Then we just say, "Mandela has gone to heaven."

Page 2

Seven of Diamonds: A plan for the **Min. of State-Owned Enterprises** to manufacture the following vehicles through **DENEL**.
Advertising slogan of DENEL Automobiles: *Everything goes right! Always right! DENEL.* **Denel/Daniel means:** *God is my judge.*

SPRINGBOK MOTORFIETSE

GROND PAD STAD
ROLL STRAIGHT AHEAD

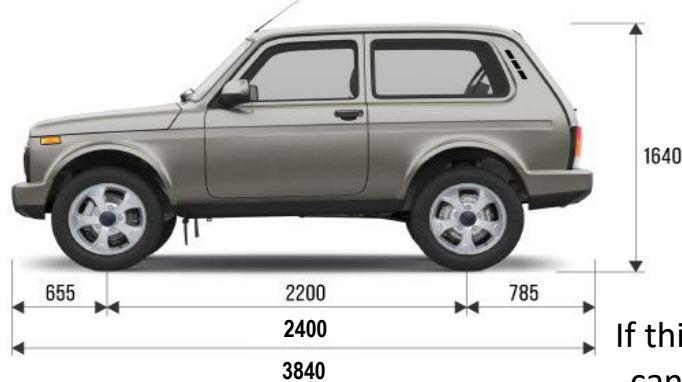

1. **Green** fuel tank with Springbok emblem and name. **White** soft Seat. **Orange** metal frame and protecting bars. **Black** knobby tyres and rubber parts for tacks. This motorbike must be powered by a very efficient **redesigned 29 Kw internal combustion engine** that weighs about 10kg and that generates **electricity for two motors** mounted in

the centre of the back wheel. It will therefore have no chain or gearbox. There will be three models. A City and Town model that can be used for deliveries or travel to work or school called a **CT**. An All-terrain model for construction sites, farms and mines that will be called a **AT**. The only difference between these two motorbikes should be their Tyres. Both should have **Orange** crash bars to protect the body of the motorbike from damage, handlebar protectors to protect the two hand operated brakes for the two respective wheels with added **green** plastic covers on the outside to protect the drivers' hands from cold wind. There is no foot pedals on this motorbike, neither clutch nor back wheel foot brake. Just an accelerator and two hand operated brakes. Its front mud guard should also be **green**. The mechanical parts are **silver** but all the soft plastic like electric wire piping and handle grips of rubber should be **black**. The green tank is where the food of the Springbok is stored and the colours white, orange and black are for the colours of the springbok. This motorbike therefore uses the basic colours of our cabinet. Black and white and yellow for the ministries and green for the money in our care. Once these two motorbikes have been built and tested as prototypes Denel should also design an Adventure

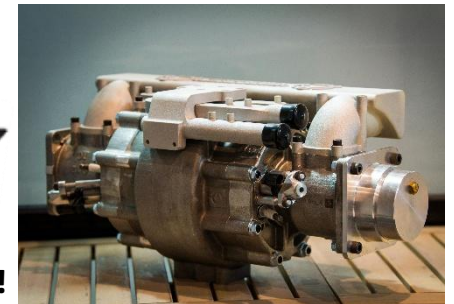

motorbike that has two of this same 29Kw engines to give you a 58kw motorbike called an **AD** for long distance travel on and off road. This is also known as a Dual-Purpose motorbike, The motorbike should have some of the design features of the Bigboy 125 Legend and the build quality of the Yamaha TW200. The AD motorbike should have the same look as the CT and the AT smaller version motorbikes.

2.A **Golden** 0.5ton bakkie with the side view of a **White** Kicking Pony as its logo and the name **DENEL** in **Black** on its load body back flap. Behind both doors against the load body should be its model name **Pony** written in large **Black**. There should be a black plastic strip inside the groove along the side of the golden model for aesthetics. The back and front bumper should be made of black rubber to be able to absorb small impacts without damaging the vehicle. This bakkie should make use of this same redesigned engine as the motorbike but this time two 29kw engines should be installed. This is an entry level vehicle that should have hand winding windows, no remote-control locking system, a needle speedometer and mechanical odometer with as little as possible of the unnecessary and unpractical electronics you get in modern cars that make them expensive, unreliable and unnecessary complex, except for a radio and air conditioner. Once a prototype has been tested the load body of the bakkie should be turned into a backseat and boot to convert the bakkie into a budget small **two-door** hatchback car like VW City Golf called **BANTAM**. The name Denel should be written on the back of its boot door. Each vehicle should have the triangular company logo as at bottom with its name.

If this bakkie is given a removable roof or sunroof it can be a beach buggy or cabriolet type of vehicle.

The small 10kg 29kW Redesigned Engine that generates electricity and which gets serviced only once every 1000 hours.

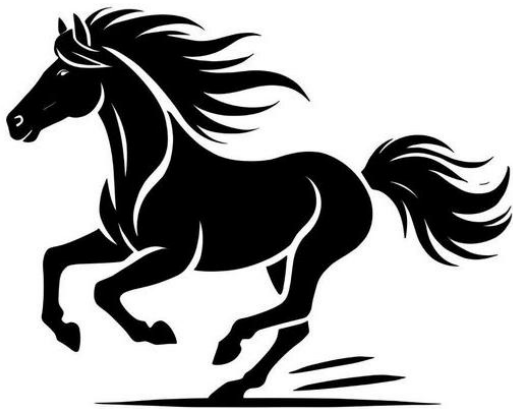

3. A **Khaki or Grey** two door All-Terrain Vehicle like the Jimny with a side view **White** Mbuzi Goat Ram as its emblem and the name **DENEL** in **Black** on its boot door that hinges on top and not at the side like the Jimny. This hinge is stronger for gravel road travel and provides cover overhead for camping against sun and rain. At the bottom of both black doors should be written its model name **GOAT or BOK**. This ATV should use the same two redesigned 29 kW engines as the Pony and the Bantam. It also has the same basic body shape to form **a family**. This is an off-road vehicle and entry level city and town car that should have hand winding windows, no remote-control locking system, a needle speedometer and mechanical odometer with as little as possible of the unnecessary and unpractical electronics you get in modern cars that make them expensive, unreliable and unnecessary complex. This vehicle's advertising slogan is: **The GOAT** or in Afrikaans **Bok vir Sports!**

The GOAT!
Greatest Of All Time

4. A **Red** or **Skye blue** 1-ton All-Terrain Bakkie with the side view of a **White** Galloping Horse as its logo and the name **DENEL** in **White** on its load body back flap. Infront of both doors against the body should be its model name **BULPERD** written in **white**. It should be sold with a load box “tralie” and canvas canopy. This bakkie should make use of this same redesigned engine but this time four engines of 29 Kw should be fitted under the bonnet. This is an All-Terrain vehicle meant for farms, game parks, construction sites and mines that should have hand winding windows, no remote-control locking system, a needle speedometer and mechanical odometer with as little as possible of the unnecessary and unpractical electronics you get in modern cars that make them expensive, unreliable and unnecessary complex. This bakkie should have the same ruggedness as the 1980’s Toyota Land Cruiser or the latest Mahindra Bakkie, but with this modern and fuel-efficient drive train that generates electricity to power four electric motors mounted at each wheel. The advertising slogan of this vehicle is in English: “**Some ride fast. Others ride everywhere!**” Or in Afrikaans: “**Sommige ry vining. Die Bulperd ry oral!**”

**Some ride fast.
Others ride...
Everywhere!**

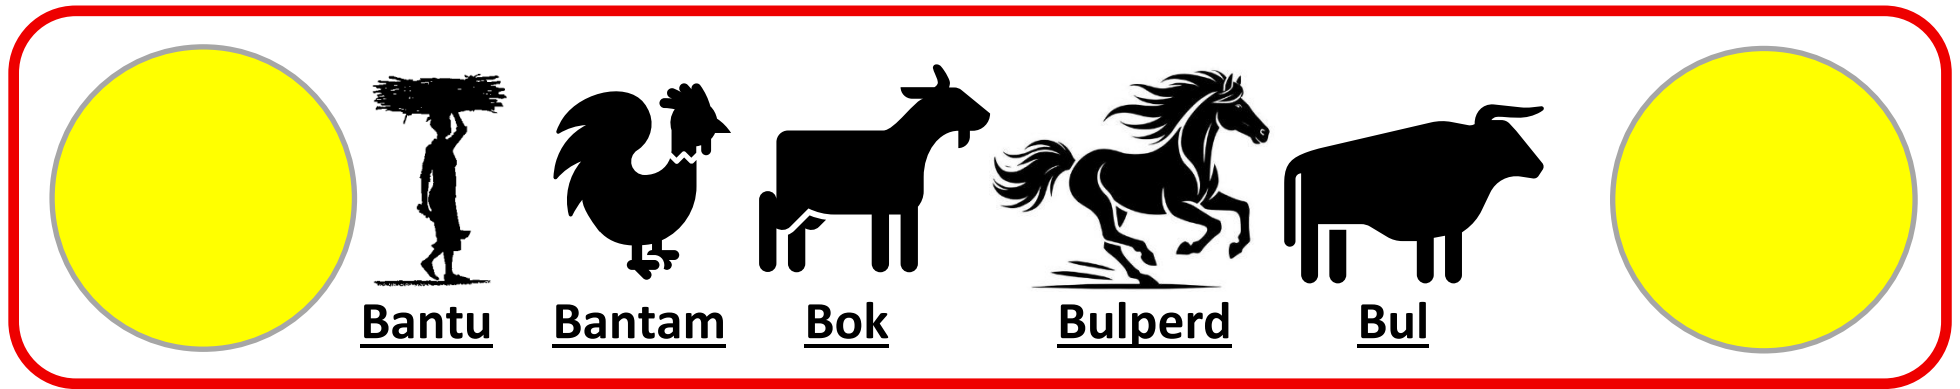

**By far the
Best 4x4**

6. A **Yellow 5-ton, 10-ton and 30-ton interlink horse** all based on the design of the All-Terrain Bakkie called a Bulperd. There should be a little image of a **Nguni Bul** on the bonnet and below it written DENEL. The 5-ton should be called **OS**, the 10-ton **OX** and the 30-ton loose head should be called BUL (or **MBU** in Zulu) These trucks should portray the image of the American Mac truck but should have the same redesigned internal combustion engine as all the other vehicles.

This specific project might not be so viable because these types of vehicles are already made by non-South African Companies in South Africa, unlike the other vehicles above. The Ace of diamonds won't drive these vehicles as well as the ones above.

The pioneering of the evolution of transportation in South Africa

A new brand of tough old-school vehicles designed with Beauty, Cost, Functionality and Simplicity in mind!

A vehicle for the working class of South African Citizens. Modern Icons!

The biggest problem with most modern vehicles is their unnecessary complexity and overdesign.

This results in a more expensive and unreliable vehicle with a lower second-hand value.

If you want to know how to design a vehicle, ask a Mechanical Engineer.

If you want to design a vehicle, ask a Mechanic.

DENEL has a history of designing and building iconic military armoured wheeled vehicles.

The Casper was the world's first mine resistant **wheeled** troop carrier.

The Ratel was the world's first **wheeled** infantry-carrying fighting vehicle followed by the world leading Rooikat Cannon.

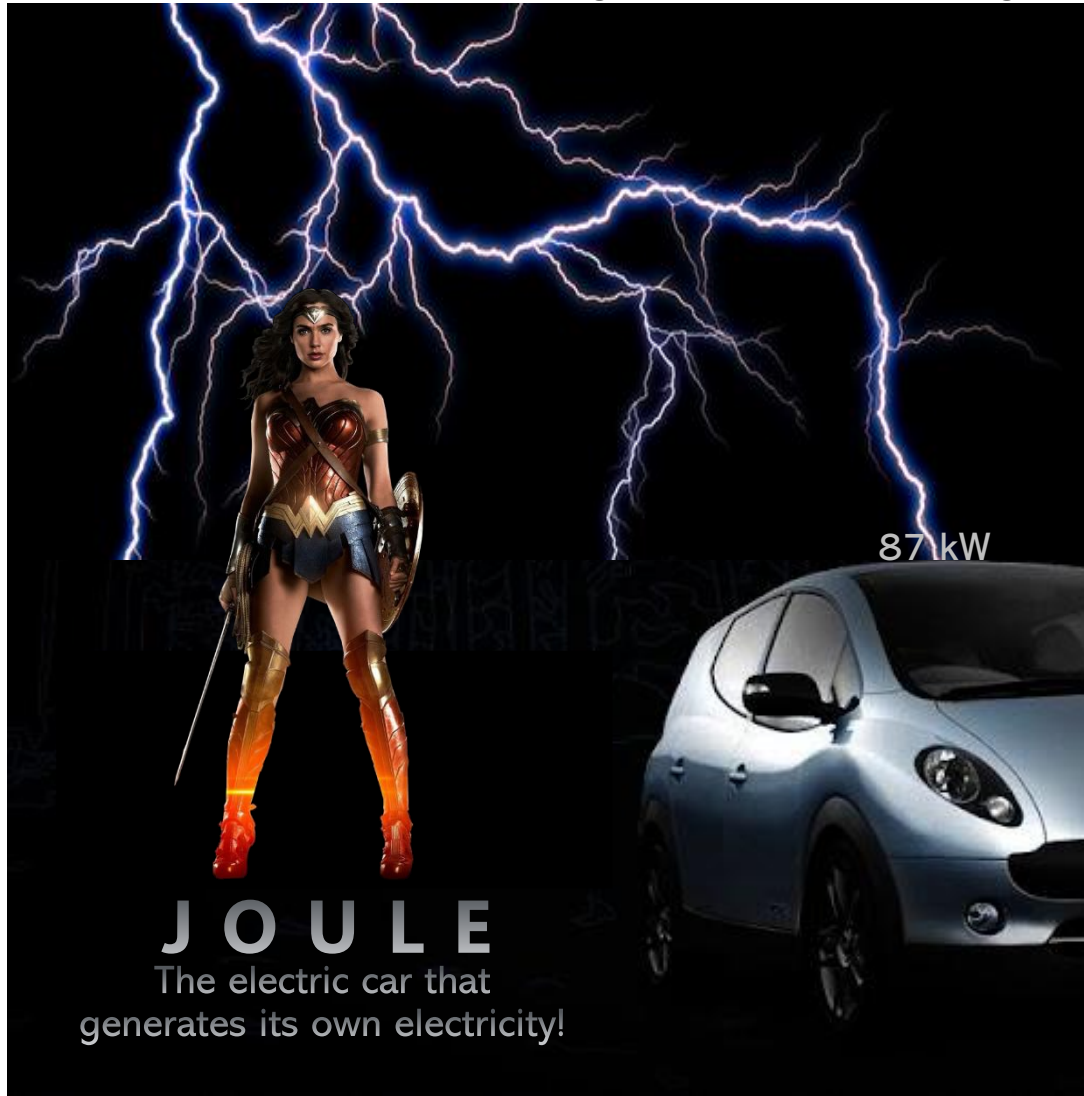

The G-6 Rhino was the worlds first **wheeled**, mine protected, long range 155mm self-propelled howitzer.

Denel has even built the Rooivalk attack helicopter like the American Apache. The US got the helmet aiming from DENEL.

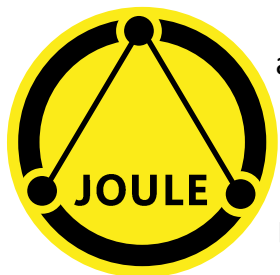

South African engineers have been very successful in the military domain, but what about the commercial domain?

7. **Joule:** The first South African designed car after the Ox Wagon. A silver luxury hatchback with yellow logoed wheel rims.

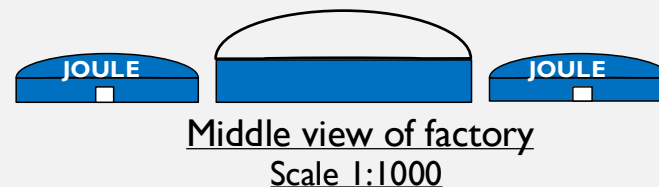

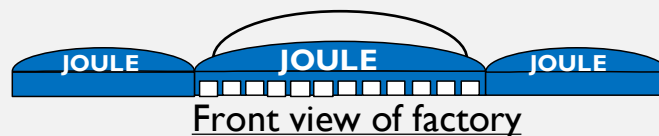

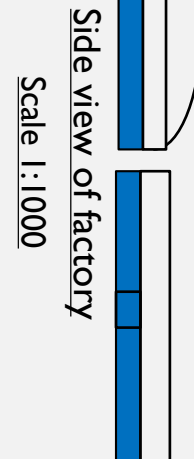

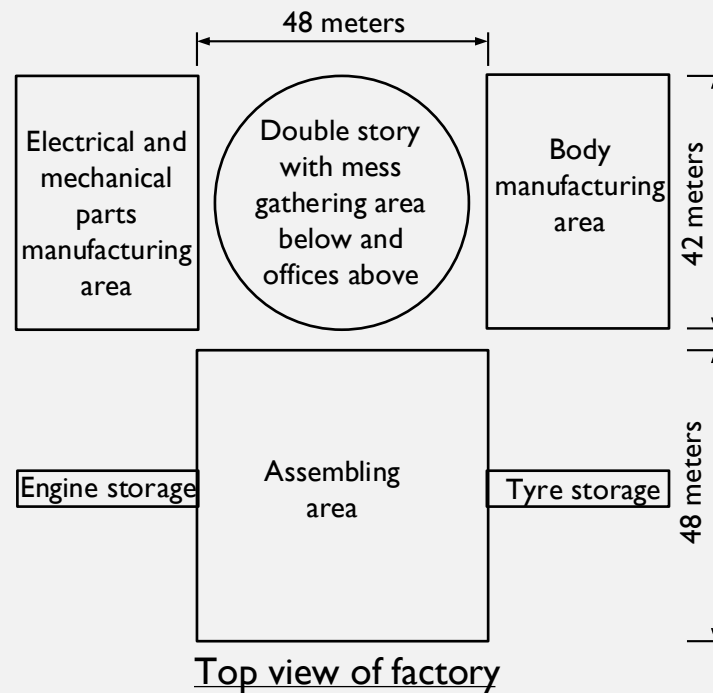

Gal Gadot with the first ever Joule electric car at the 2005 Paris Motor Show. It was regarded as the best car on the show. It has the same refined look of a Porsche, without the price tag.

The logo design according to the Joule's 3 steps of energy transfer.

Translational to Electrical to Rotational.

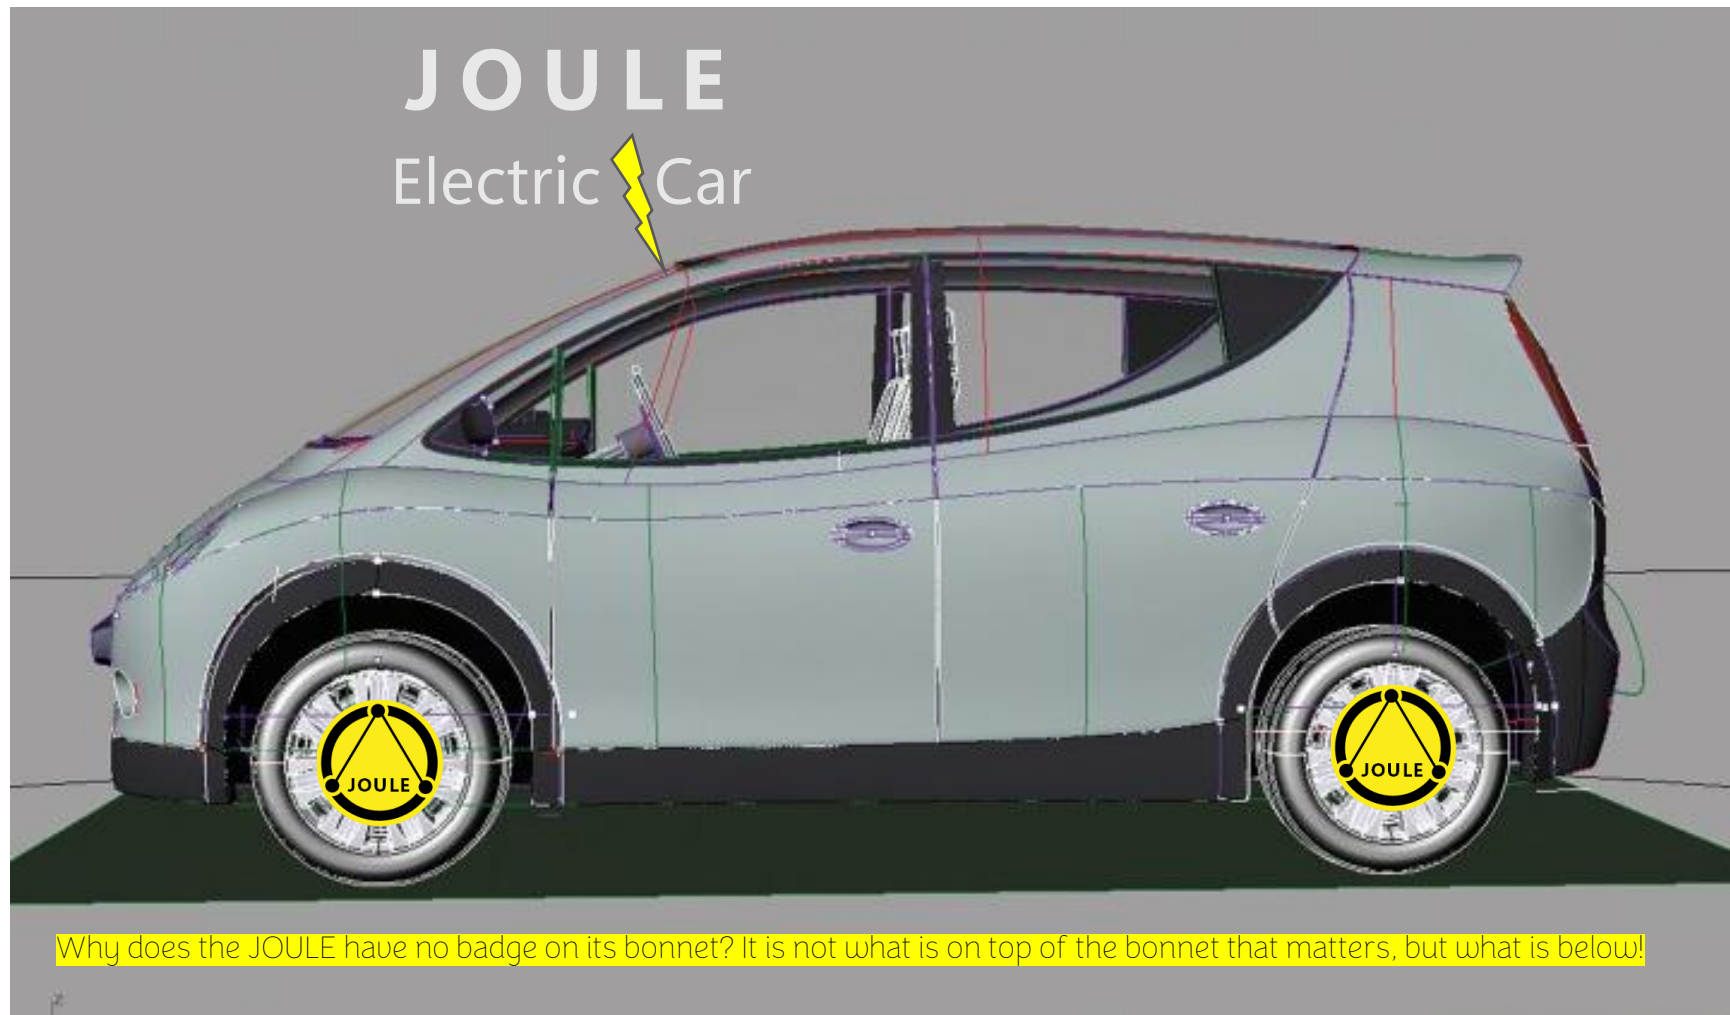

Factory Layout

The assembly production line for motorcars was invented by Henry Ford to manufacture the Model T Ford for a lower price. He got the idea after he visited a cattle abattoir. Cattle are wild animals and are therefore all lined up in a narrow passageway in one group. After the first animal is killed the disassembly process starts by first hoisting up the heavy carcass and then moving it down a line of workers that each stays in one place. A car however is not disassembled from one wild big heavy part. It is rather assembled by adding relatively light and tame parts together. You can therefore put up a more efficient production line for cars by having multiple entry points and making the production line static and not dynamic. Then there will also be multiple exit points. This factory has twelve exit points. Just like the JOULE has a more efficient redesigned internal combustion engine, it must also be build on a more efficient redesigned static production line.

This factory design lends it perfectly to labour intensive manufacturing. The robots that are being used in modern car factories cannot compete either for cost or speed of assembly with a well-motivated team of workers. You have no capital cost with a worker while an expensive robot must be imported at great cost. Profit is not made by selling cars, it is made by building cars!

People buy cars for three basic reasons

1. Practical reasons and utility like transportation, safety, fuel efficiency. The Joule's boot is big, as it has a small engine.
2. Emotional satisfaction and personal expression or identity. People buy cars that make them feel good, confident, reflect their values such as ruggedness for adventure or eco-friendly credentials. The emotional connection often overrides purely logical reasons. This fuel-efficient, hand-build, well-designed truly South African car will have the edge here.
3. Status, Prestige and achievement which all entails social signalling of success. The Joule looks like a hatch back Porsche!

The Downside of a battery driven electric car industry like TESLA and BYD:

Key Findings on Copper Availability

- Current copper mining rates are insufficient to fully electrify the global car fleet by 2050. While copper resources exist, production must increase by over 55% to meet demand, requiring dozens of new mines. EVs need 80–180 kg of copper compared to 20 kg for internal combustion engines (ICE), straining supply chains. While there is no permanent geological shortage, the speed of extraction and refining is the primary bottleneck.
- **The Gap:** To meet 2050 electrification goals, the world would need to mine more copper in the next 30 years than in all of human history prior to 2018.
- **Production Challenge:** Bringing new copper mines online takes an average of 23 years, making rapid scaling difficult.
- **Alternative Strategies:** A rapid shift to 100% hybrid vehicles by 2035 is seen as a more realistic, less resource-intensive alternative, as hybrids require much less copper than full EVs. *The Joule is a hybrid.*

Key Findings on Lithium Availability

- **Resources vs. Production:** While lithium is abundant in the earth's crust, the bottleneck is not the total amount, but the speed at which it can be mined and processed into high-quality battery-grade material. Current global lithium production is roughly 100,000 tonnes per year, but by 2030, demand is expected to be 2.5 to 5 times higher.

Battery Concerns: Long-term battery health in hot climates and high replacement costs are risks for second-hand buyers.

Charging Limitations: Public charging infrastructure can be unreliable, sparse in rural areas, and charging takes much longer than filling a gas tank (30 minutes to over 12 hours).

Range Anxiety & Efficiency: Real-world range is reduced by cold/hot weather or high speeds, making long trips more difficult.

Higher Initial Costs: EVs often have a higher purchase price than comparable internal combustion engine vehicles, although this is improving

An EV cost R0.65/km to charge at home, but public **charging costs** R1.3/km. The fuel cost of the Joule will be R1/km including the fuel tax, as it will be able to do 20km/litre with its redesigned internal combustion engine without resorting to Hybrid technology which will improve it further. The engine is 30% more efficient than a conventional one and the energy transportation has very little friction compared to mechanical transport of energy. Because home charging of an EV is only taxed 15% VAT unlike the more than 30% tax levied on fuel at the pump the government will eventually levy other taxes on Electric Vehicles to make up for this unfair practice.

The other significant problem with EV's in South Africa is that they just **move the cars exhaust** pipe to the fossil fuel power station. EV's are therefore not more environmentally friendly unless their electricity is generated by green energy.

Because an EV does not work to generate its electricity it basically follows the same concept as a **parasite**, the same as a thief.

Six of Diamonds: A 9mm Polymer Pistol for the Police, Army and Citizens of South Africa made by DENEL that functions like the Glock 43X from Austria.

The Vector
vs
the Glock.
Which is more
beautiful?
Why did South
Africa stop
making this
magnificent
pistol so soon?
Too bad.
So sad.

The Denel & Wessels
Model 327

scandium alloy framed

revolver

chambered in

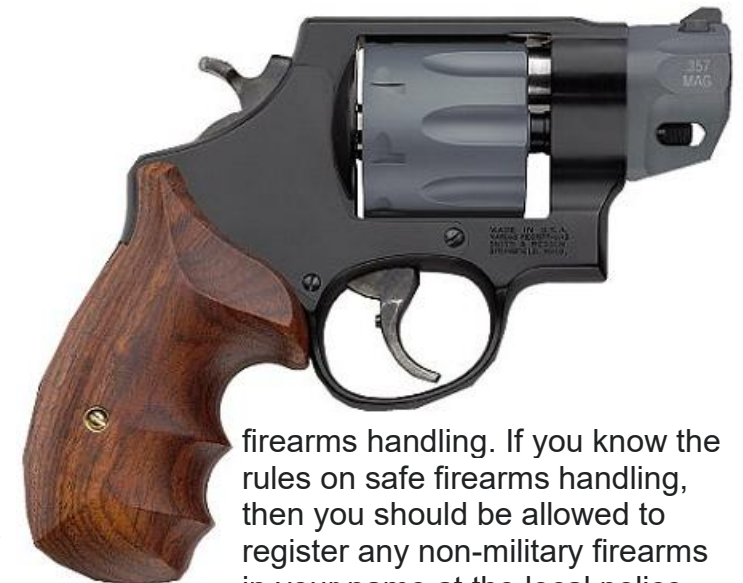

.38 Special

8 Shot Cylinder

2" Barell

more Beautiful than Beautiful.

Six of Clubs: Firearms licencing
A firearm is no more dangerous than a
motorcar. Firearms licencing should
work the same as the system for drivers
licencing and vehicle registration. You
need to write a test at the Police station
with a standard questionnaire about safe

firearms handling. If you know the
rules on safe firearms handling,
then you should be allowed to
register any non-military firearms
in your name at the local police
station. They should also issue
you with a license certificate.

Five of Diamonds: A labour-intensive clothing manufacturing business initiated by the **Minister of Higher Education**.

Brand name: Tabletop Tops.

Slogan: Simply Top Tops!

Colour combinations: **Black** top with yellow logo or **Yellow** top with black logo

Green top with white logo or **White** top with green logo

Blue top with red logo or **Red** top with blue logo

Clothing manufactured: Quality Thick or T-shirt material Long Sleeve Pullover Tops with big logo

Brand name: Giraffe Jeans

Slogan: Great Jeans

Colour of pants: Blue/Brown/Grey

Four of Diamonds: A national courier business initiated by the **Minister of Police** once crime is under control.

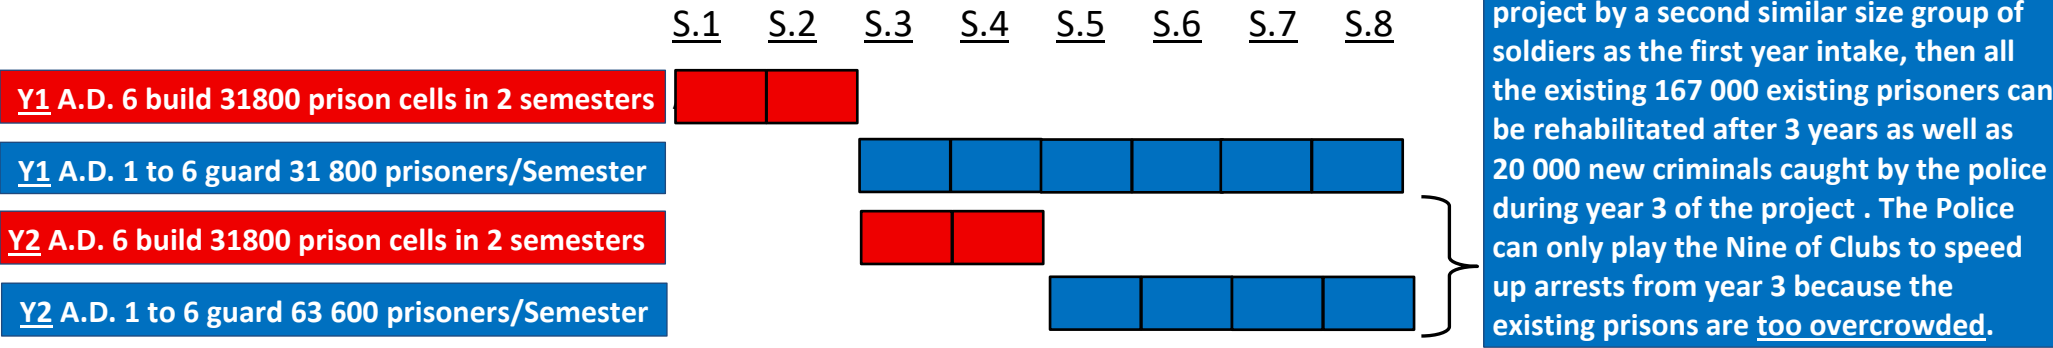

Brand Name: Courier with South African Police

Three of Diamonds: A plan for the **Ministry of Intelligence** in coordination with Eskom to design and build Energy Generation Facilities that will create Cheap, Clean and reliable energy through Nuclear and Hydro power.

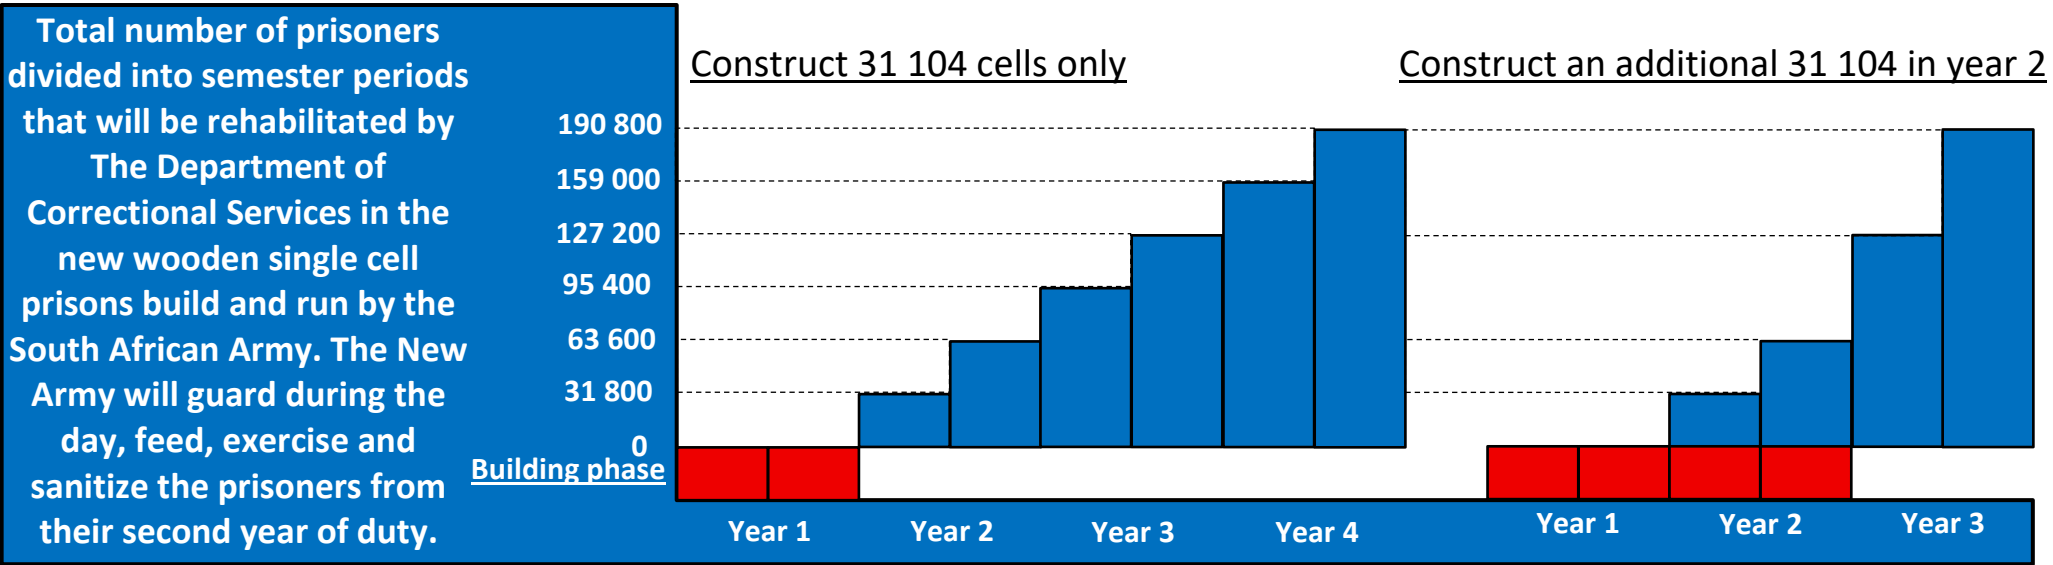

*South Africa needs more **Entrepreneurs**, starting in the government, to reduce unemployment and poverty in South Africa.*

Ace of Clubs – The plan for the **Minister of Correctional Services** to ultimately eliminate crime in South Africa by rehabilitating criminals quickly, cheaply and in a most excellent way.

Time frame of the Project:

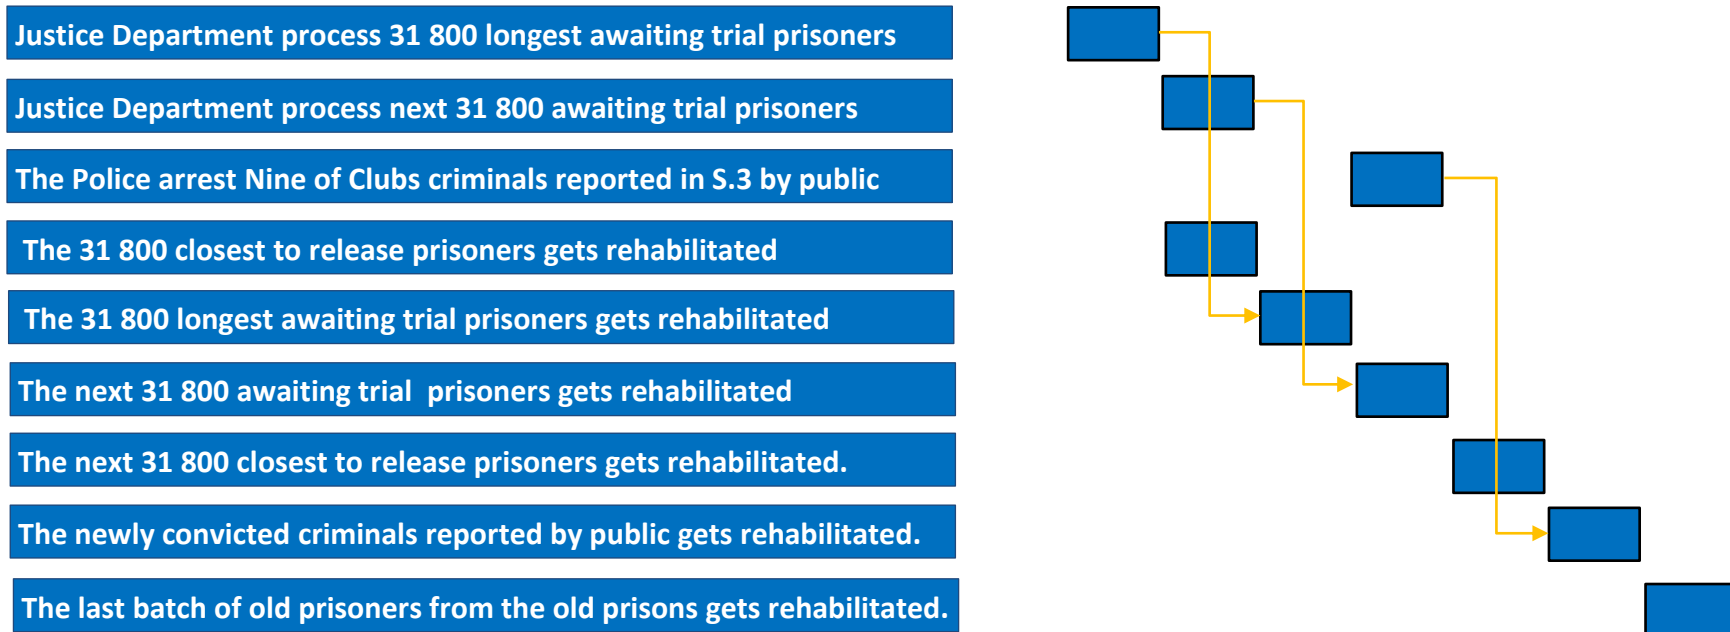

Y1 = First Year intake soldiers Y2 = 2nd Year intake of soldiers A.D. = Army Division S.1 – S.8 = The semester the project is in.

Even though it will be one year quicker to do the rehabilitation of the criminals if a second group of Army soldiers build another set of 31 800 prison cells in year two, it is good enough to do it in four years. The prisons build in the second year will only be used twice. If one build just one set of prison cells they can be used six times over a 3-year period and the cost will be cut in half. Once the first three sets of prisoners are out of the existing prisons at the beginning of semester 5, then all criminals that are newly prosecuted can be temporally locked up in the old prisons, because there will now be space for them in the previously overcrowded old prisons.

The **Minister of Defence** must recruit and organise a new young **Land Army** to execute the **Ten of Clubs & Seven of Spades. Various Divisions** (468 soldiers in total, 7 Divisions, 13 Companies, 39 Commandos of 12 soldiers each)

1. **Nguni cattle Division** (108 soldiers) **Three** Companies of 36 **isiZulu men** with three Commandos of 12 men in each company.

Year 1 = Build 3 hiker huts & ablution/station in the Drakensberg Mountains according to indigenous style and improve trails.

Year 2 = **One Nguni** company guard 2592 prisoners of **Limpopo** and **Two Nguni** Companies guard 5184 prisoners of **Natal**.

2. **Mbuzi goats Division** (72 soldiers) **Two** Companies of 36 **isiXhosa men** with three Commandos of 12 men in each company.

Year 1 = Build 3 hiker huts & ablution/station in the E.C./Western Cape/Cederberg Mountains according to indigenous style.

Year 2 = The **Two Mbuzi** Companies guard 4320 prisoners of the **Eastern Cape**. (60 inmates per guard)

3. **Bosvelders Chickens Division** (48 soldiers) **First** Company of 24 **Xitsonga men**, **Second** Company of 12 **isiNdebele** & 12 **siSwati men**.

Two Commandos of 12 men in **first company** & two Commandos of 12 men in **second company**.

Year 1 = Build 2 hiker huts & ablution/station in the Mpumalanga Mountains according to indigenous style and improve trails.

Year 2 = The **Two Bosvelders** Companies guard 3456 prisoners of **Gauteng**. (72 inmates per guard)

4. **Windsnyer Pigs Division** (48 soldiers) **One** Company of 36 **Setswana men** & 12 **Tshivenda men** being four commandos of 12 men.

Year 1 = Build elevated rail line in Kruger National Park with individual electric transportation cubicles suspended from rail.

Year 2 = The **One Windsnyer** Company guard 3456 prisoners of **Gauteng**. (72 inmates per guard)

5. **Nooitgedachter Horse Division** (72 soldiers) **First** Company of 36 **SeSotho Men** and **Second** Company of 36 **Sepedi Men**

There is Three Commandos of 12 men in each **company**.

Year 1 = Build 4 rower huts at 6 stations along 140 km Orange River between Orania & Douglas and indigenous canoes.

Build a contour rowing route on the hill of Fort Klapperkop Nature Reserve in Pretoria. (Sesotho)

Build a contour rowing route on the hill of Fort Schanskop close to the Voortrekker Monument in Pretoria. (Sepedi)

Year 2 = The **Sesotho Company** guard 2160 prisoners of **Free State** & the **Sepedi Company** guard 2592 prisoners of **Limpopo**.

6. **Meatmaster Sheep Division** (108 soldiers) **First** Company 36 **Afrikaners**, **Second** Company 36 **Coloureds** and **Third** Company 36 **English**

Each of the Meatmaster Commandos consist of 24 **Men** and 12 **Women**

There is Two Commandos of 12 men and One Commando of 12 women in each **company**.

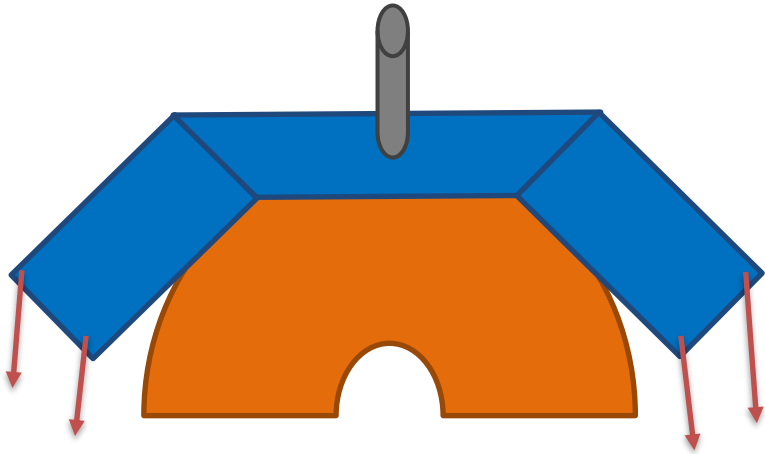

Year 1 = Each company build 10 600 prison cells in the Karoo. GP = 7000, Natal = 5400, Limpopo = 5600, NC/FS = 4200, WC = 5200, EC = 4300

Year 2 = The **Afrikaner Company** guard 2160 prisoners of **N.C.** The **Coloured & English Companies** guard 2592 prisoners each of **Western Cape**.

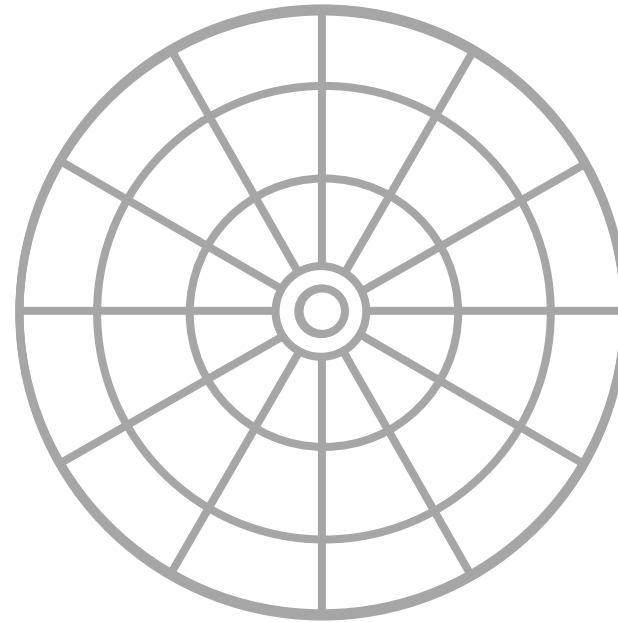

7. **Boerboel Dogs Division**: One Commando of 12 **Indian and all other Eastern men**. They will be the YouTube intelligence gathering Commando.

Year 1 = Build shower cubicles with plumbing & some prison cells. **Year 2** = Build pre-cast concrete building&bridge parts and test their efficiency.

Hiking Hut build by Army Divisions 1, 2 and 3 in Indigenous Style.

The metal frame on the right of the Indigenous Hut is covered by Brown Bonsmara cattle skins which are stretched in place while still wet but treated with salt. Over this is put a blue canvas which are then anchored down into the ground. In the middle of the hut is a wooden cooking stove. The army must also install a water storage tank, build an outside shower bathroom, toilet, evaporation cooler pantry, and small water catchment weir in a stream that will feed the storage tank, shower, toilet and evaporation cooler.

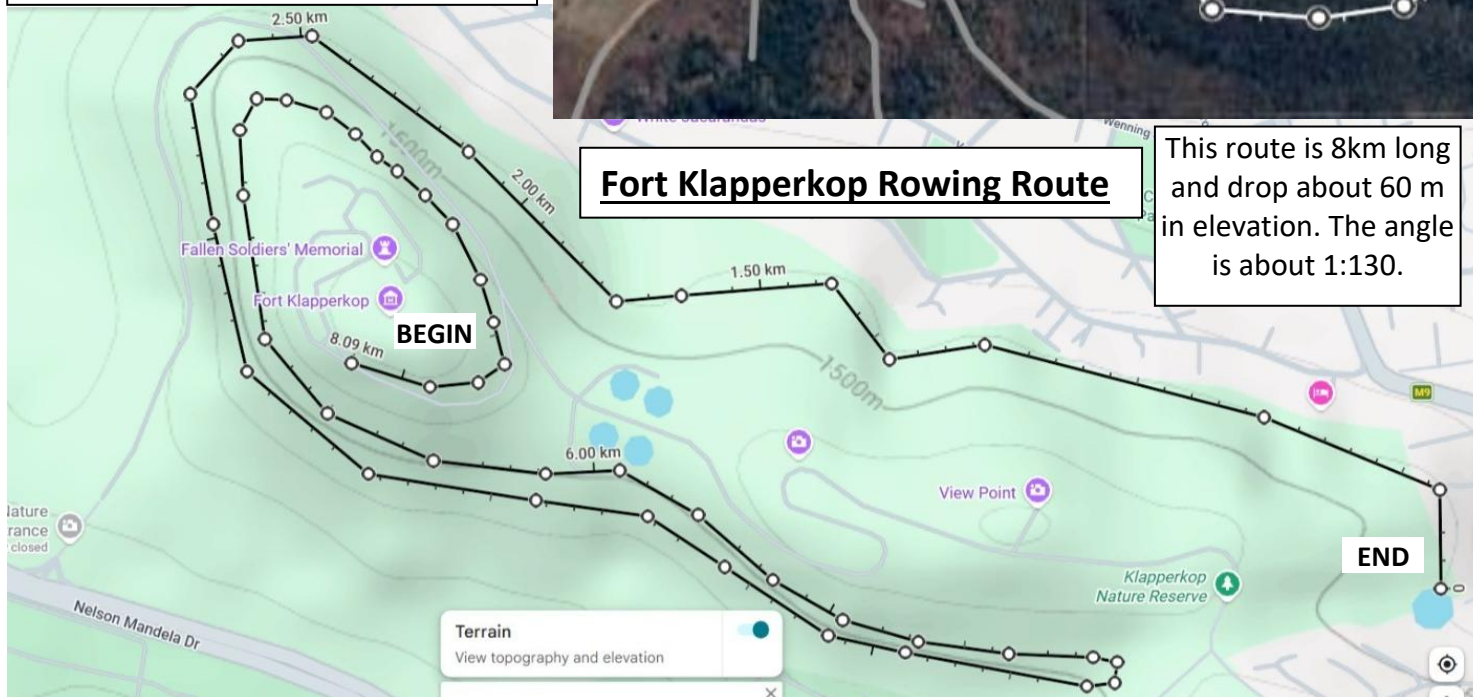

The vertical frame of the Indigenous Hut is made of twelve 25 mm stainless steel pipes rolled into a 3.8-meter radius each. The base of the floor has a diameter of 8 meters. The hut is 3.8 meters high in the centre. The horizontal supports are 8mm steel bars rolled into diameters of 3.8m 2.8 and 1.8m that are tied to each vertical support and pulled tight. If hikers sleep with their heads to the wall and their feet towards the centre one hut will be able to accommodate a maximum of twelve people.

Two **Kajak rowing routes** build by **Army Division 5** down the contour lines of these two iconic fortified (bronze) hills spoken of in Zachariah 6:1. The route start at the top of the hill at the forts and circles down the contour line to a pond at the bottom of the hill. The route comes in the shape of a canal dug by a small excavator. The water is pumped at a rate of 28 litres/second or 100m³/h which results in a flow speed of 1.4 m/s in a 160mm PVC pipe if a 50kw motor is used.

Fort Schanskop Rowing Route

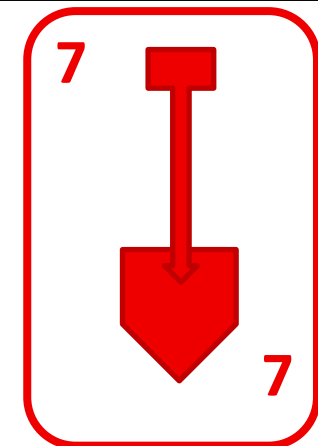

This route is 3.6km long and drop about 80 m in elevation. The average angle is about 1:45. This route will therefore have more whitewater.

Fort Klapperkop Rowing Route

This route is 8km long and drop about 60 m in elevation. The angle is about 1:130.

If the canal is 2metres wide and the water flow 160mm high, then the subcritical flow speed will be 312 m/h.

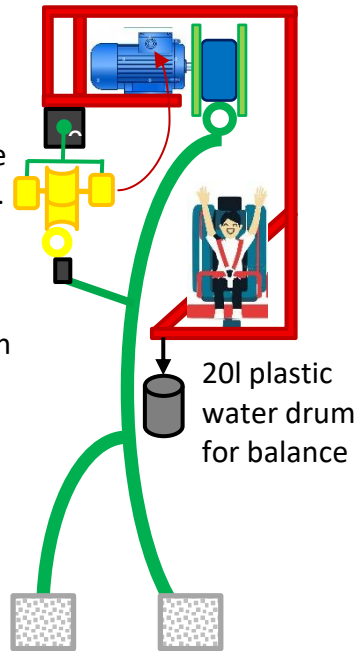

The Kruger National Park elevated rail line & car build by Army Division 4

The rail car runs on a 32mm inside diameter steel pipe, with a 200mm diameter blue elastic rubber wheel with thread width 46mm, made by Rybro SA. The car frame is made with a single red painted 38mm square tubing supported at the corners for strength.

Energy is provided by an electrical copper wire cable with copper pulley running on top to pick up electricity.

A 32 mm steel pipe (42.2mm outside diameter & 4.85mm wall thickness) has a safe yielding moment of 1100 Nm. Because an occupied rail car weighs 150kg, the vertical green posts must be spaced every 2.99m. By welding two 40mm steel flat bars at the bottom of the pipe this distance can be increased to every 5 meters.

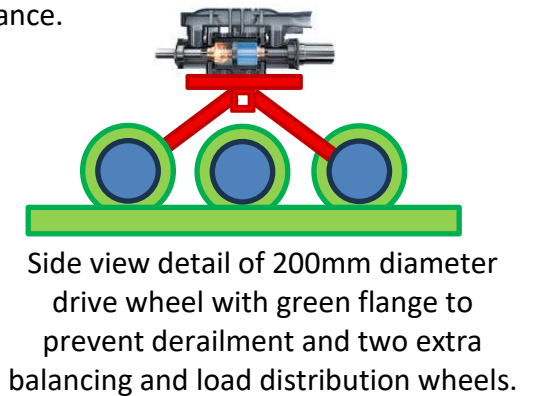

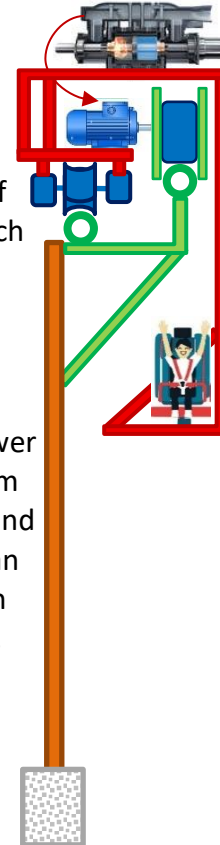

If the 200mm diameter blue drive wheel turns at 750 rev/min the max speed of this vehicle will be 28 km/h which is just right for game viewing.

Alternatively install a redesigned engine on top that generates electricity for the 7.5 kW electric motor. The 15kg engine can be shifted for balance.

Bearings on both sides of pulley to attach it to frame.

Eucalyptus power line pole of 7m tall above ground so a giraffe can walk through underneath.

The Green Joker is a plan for the **Minister of Tourism** to address the big Joke of the current hypocritical empowerment plans of the government, namely the fact that the needs of the most disenfranchised people of Southern Africa, **The Bushmen**, is not addressed at all. They lost all their ability to thrive as well as all their land. The Kruger National Park is our biggest game park. A small extended family group can easily be repatriated there where they used to thrive many hundreds of years ago. This overhead rail line will allow tourists to watch them eke out a living in their ancient traditional way of life without interfering with their methods or social life. Some hypocrites take exception of the name Bushman. San is a scientific name. It's the same as using Homo Sapiens instead of Human Being or just People.

Cells Build by: Afrikaners= 9504 English= 9504 Coloured= 9504 Indians=2592 cells and 2592 showers

It takes one hour to build a cell by a group of 6 soldiers. This means they build 9 cells per day. There are 6 groups of 6 soldiers in each division. They will use two days to prepare the parts of each cell, for ease and speed of construction and then assemble the cells over 4 days each week. Each Division will therefore build in a week = $9 \times 4 \times 6 = 216$ per week. If they take four holidays of 1 week, 2 weeks, 1 week and then 4 weeks they will spend 44 weeks of the year building. Total number of cells each division can build in a year is $216 \times 44 = 9504$. The three divisions can therefore build $9504 \times 3 = 28\,512$ cells in one year. The number of cells left for the Indian Division of 12 men to build is therefore $31\,104 - 28\,512 = 2592$. This will take them $2592 / (9 \times 4 \times 2) = 36$ weeks to complete. This will give the Indian Division 8 weeks to complete 2592 shower cubicles. It takes about the same time to build 4 cubicles as it would to build one cell. They will therefore take $2592 / (4 \text{ per hour} \times 9\text{h/day} \times 5 \text{ days build/week} \times 2 \text{ groups}) = 7.2$ weeks to build all the shower cubicles. The other ablution facilities of these prisons are a topic for another time, but it is less technically difficult to construct. All Prisons with 60 cells in a row, must get 5 showers at the end of each row and those with 72 cells in a row, must get 6 showers at the end of each row. If the guard accompanying a group of 5 or 6 prisoners, depending on the number of showers he has, takes 10 minutes from leaving the cell, showering and then back per group of 5 or 6 prisoners, it will take his whole group of prisoners 2 hours to shower. They will go for a shower on a Saturday afternoon. Week afternoons they will spend half an hour per person inside their cells developing a craft that they can use to earn money once they are rehabilitated and also as a way to get mental stimulation. The day will start at 7:30 when a guard will start to make coffee by heating two kettles water on a gas plate. He will heat 6.5 litres per kettle if he has 60 prisoners and

7.5 litres if he has 72 prisoners. Once he has put the water on the stove, he will walk down the row and open the small drop doors inside the cell door that is used for serving food and drink into the cell, as well as to cuff the prisoner while he is pushing his hands through the opening from the inside. On the way back he will also let the window shutter of each cell down. He can then greet each person and see if he is good. Once the water is above 80 degrees Celsius, he throws half a box of 500gram Koffiehuis Gold in each kettle on the stove and stir. After a minute he adds a litre of milk and wait two more minutes. Then he goes down isle with the two kettles in a wheelbarrow, pushed by a different prisoner each day, to serve each prisoner a coffee inside a plastic mug that the prisoner keeps inside the cell with him. Before he starts, he first must put the water for the maize porridge on the stove. If there are 60 prisoners in his group, he must heat 6 litres in four 10 litre pots each on two gas stove plates and if there is 72 prisoners he must heat 7.2 litres in four 10 litre pots each. When the water is heated, he adds 2 litres of maize meal for 60 prisoners and 2.4 litres of maize meal for 72 prisoners. After coffee each Guard take groups of 10, if he has 60 prisoners under him and 12, if he has 72 prisoners under him, for a run from their prison cells to the end of the row, then to the other end of the row and then back to their cells. To cut a long story short these prisoners will be treated with respect and dignity if they give their cooperation unlike the current prison system which is more like animal housing. This will be Fivestar treatment compared to what they are used to at a fraction of the price. These prisons won't cost 500 million to build per year. The current budget of correctional services is 50 times that. The current government works incredibly inefficient with the people of South Africa's hard earned tax money. No wonder a packet of cigarettes is so expensive. The biggest problem is however that the police make one million arrests per year and they only get 3 percent or 30 000 convictions per year. This means not only is the criminal justice system broken but its also overwhelmed. The prisons can't handle 1 million prisoners per year. There is only space for 100 000 in total. The only solution to this problem is therefore leadership from the government which is totally absent at this stage. Have anybody ever seen a governmental law posted up, or emphasized in any way from a public platform like Do not steal or Do not murder or Do not Rape. Nothing. Not a peep. This has to and will change if the AC/DC takes over the government of South Africa.

Eight of Clubs In order to use a six-month rehabilitation program for criminals the Death penalty must be reinstated for aggravated murder or premeditated murder after the initial amnesty period has expired. If this is not done the six-month prison sentence would not be a deterrent for someone to commit murder. For murder the criminal would therefore receive justice without grace, which is true justice. If someone murders an innocent person, the same must be done to him by the state in order to give the victim justice. Otherwise, it is unfair to the victim. Nobody has the right to take the life of another person other than in self-defence or war. The death penalty for murder is justice. It is how humans have treated this crime all throughout their history. An eye for an eye. A tooth for a tooth. The punishment equals the crime. That is justice. Nobody has to receive the death penalty. Just do not murder anybody. If somebody gets the death penalty it is his own doing. The death penalty was always part of South African law in the past.

Five of clubs involves a Plan for the Minister of Human Resources to help her bring an end to corruption in the state through enabling anybody to report serious corruption in the state to her office personally through a simple phone conversation. The informant's identity will be kept secret to protect him/her from persecution by corrupt individuals. The Human Resources Minister then send the Scorpions to investigate this corruption, if she regards it as serious, based on all the evidence the informant has provided. If the Scorpions found there are reasons to be suspicious, the National Prosecuting authority will take all those involved for a hearing with the Judge in court to determine their guilt or innocence. The witness won't be involved in the court case or any further investigation that might expose his /her identity. The ones found guilty will be dismissed from the state and send for rehabilitation, because they have stolen from the people of South Africa. The witness who informed the Minister of Human Resources about these corrupt activities will get one month's salary of every perpetrator that came to justice thanks to the information provided by the witness to the Minister of Human Resources. Putting a stop to corruption saves the government far more money than the monthly salary of the corrupt individual. The government must reward its most loyal citizens in this way and also to encourage them to help the Minister of Human Resources find and root out corruption.

Four of clubs involves a plan for the Prime Minister to create a group of loyal and patriotic letter readers called the SS or Secret Service to which private citizens can write a letter to the Prime Minister in which they can lodge a complaint, make a compliment, make a suggestion of an idea they want the government to implement, like tar a road, renovate a building, make a law etc. or report something serious of national importance.

Three of Clubs involves a plan to end all the death and destruction that the people in the world's oldest active war have been exposed to. This is the war that has been raging in and around the land of Israel. Bringing an end to all this suffering and destruction of property will give the South African Government the chance to ask for a reward from all those who have benefited from our wisdom. Some of this cash injection the Minister of Finance should utilise to raise the monthly pension substantially of people who have worked all their lives in the South African economy and now has to live of a small monthly income and in many cases also support others. Once they spend this money it will also stimulate the South African Economy to a certain degree.

Two of clubs involves a plan to end the massive 1. **drug epidemic** in America that causes much suffering to drug addicts, and which is responsible for 80% of all crime in America. While we are at it, we will also help the Americans 2. end the **mass public shootings**, 3. help them find common ground instead of **political division**, 4. help them bring their run-away **National State Debt** under control 5. solve the Taiwanese/Chinese crises that is threatening to drag America into a very big and unnecessary **war with China**. Now the Americans are an extremely rich Nation despite their Government running the worlds biggest and longest lasting pyramid scheme to keep their state finances afloat. Just imagine how much money, the South African government can demand from them for bringing an end to these crises they have no answers for. Some of these issues are existential threats to them and potentially very damaging to the rest

of the world, including South Africa. This cash injection the Minister of Finance should utilise by using one third of this money to pay off the state's debt, one third invest in the Ten of Diamonds and the other third spend on creating more Base Load Electricity Generation through Nuclear or Hydro Electric Power to give South Africa more reliable, cheaper and cleaner energy. The Congo River Basin in the Central African Rainforest has the worlds biggest untapped Hydro Power Potential. One do not even have to build a big dam (like the one that has been designed but for which there is no money or skill to build) to gather the water during the rainy season, because the Congo River flows at the same volume throughout the year.

The Ace Of Spades is the most powerful card in the pack. This idea simply states that in order to have a well-functioning government, state and private sector businesses the best people that will have the best outcome must be empowered with the highest positions to have the most power over most major decision-making and the spending of resources to accomplish the best outcome for all citizens. You cannot benefit one person with an honourable high paying job and then the whole society suffers because of his incompetence or dishonest work ethic. This is what happened at the tragedy when the mine workers died at Marikana or the lack of cheap reliable electricity every citizen in South Africa has to endure. If we want to become the best governed country in the world we need to empower our top leaders in positions that suits their interests and talents irrespective of their party affiliation.

The Three of Spades is about the development and creation of modular concrete precast shapes by the **Ministry of Intelligence** that can be used by the Army to construct bridges and high-rise buildings easily, quickly and cheaply. The saving in this regard is made through the fact that there is no shuttering on site, and that the modules can be made through a manufacturing production line process and then transported to the site and then assembled quickly and easily into the desired structure.

The Two of Spades is the informal meeting through which the **Ministry of Intelligence**, with the help of their ADVISORS will advise the Prime Minister and Cabinet Ministers on any new idea they think the cabinet should consider or a problem the cabinet wants to bring to their attention to help solve. This group will be the appointed professional experienced expert advisors while the population through the Secret Service or **Four of Clubs** will be the amateur advisors to the cabinet. Although the citizens of South Africa will lose their ability to vote for the political party of their choice, they will get the chance to have access to the desk of the Prime Minister or relevant Minister to their letter. The best letter writer from each province, according to the Prime Minister, will be his voters or Parliamentarians sitting behind him in the parliament meeting to vote on any issue with the Administrators of the Government. They will also receive a green Administrator Shirt with a Springbok emblem on the pocket and a green citizen cap to attend the parliament meeting in as well as one silver Kruger Rand as payment for their service to their country. They will arrive the day before and all be booked into a City Lodge type of accommodation so they can be briefed on the procedures for their big day.

What about the **Trumps**? No need for Trumps. We are holding all the cards. The question is can the voters of South Africa see that?

The Blue Joker involves addressing the Joker of the world for the unnecessary war he has started in Ukraine to boost his ego and honour, wealth and power, prestige and legacy like the warlords of a bygone era, at the expense of the lives and livelihood of millions of innocent people from both Ukraine and Russia.

Vladimer Zelenski - Angel of Light.

Vladimer Dracula - Angel of Blood.

Vladimer Putin – Angel of Darkness and Lies.

The Russian National Emblem and shield.

On the shield is a Knight that slays a dragon lying beneath his horse with a long pike.

P.S. It does not mean that the plans of the AC/DC are finished just because the cards are finished.

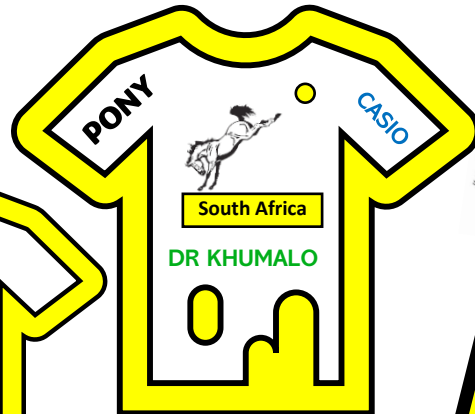

The Dragon Symbolises an evil power that exploit people by force for his own benefit. What a loser! The fire the dragon spews from his mouth is the lies an evil power uses to dominate others for his own benefit. The only good leader Russia has had for the past 100 years is Michael Gorbachev. The Russians should rather appoint Chess Grandmaster Gary Kasparov as their president.

Two of Diamonds: Cultural monument to be built at Mapungubwe

The purpose of the cultural centrum should be to house all the archaeological artefacts that were found at Mapungubwe that are currently in museums. Against every of the supporting wooden pillars of Camelthorn should be attached a board with the word laughter in every one of South Africa's twelve languages. There should be twelve pillars, one pillar for each language with the word laughter in that language written on it. The roof should be made of thatch supported by twelve Eucalyptus poles. One vertical pole should stick through the top to form the frame for the top handle of the **Sesotho hat** with a big yellow enamel dish on top.

The South African Christian Democratic Company will solve the problems of South Africa Laugh-Laugh if the voters of South Africa, especially the Christian Voters, empower them to do so!

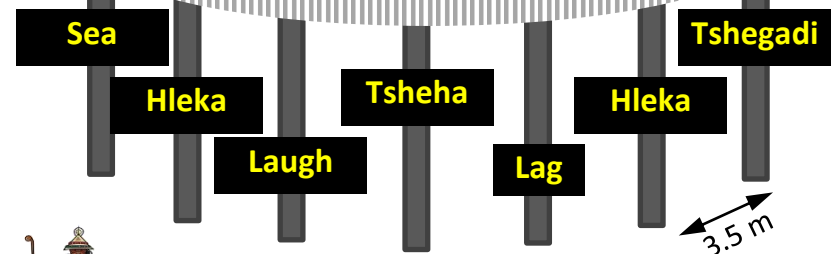

The Flag should be made of signage metal and should stay there permanently. The Flag's frame gets attached to a 32 mm pipe with a bearing.

The **Bluebills** lost to **Toulouse** because they got confused during the coaches' instructions between the game plan and the name of their opponents. Pretoria Afrikaners do not understand English well. They also do not know much about cattle it seems.

Fly the Flag for Football

Die **Witperd** eet nie van die grond af nie, nes die **Bloubul**. Stoetperde eet uit die krip. Uitskot Slagbulle eet ook uit die krip maar Stoetbulle eet gras wat op die **grond** groei.

To put Bafana Bafana in a position to win **the Soccer World Cup** we need to identify the best team of teenage soccer players for each age group in every province through a scientific method and then develop them through starting a soccer academy in each province at a school with a hostel. These different soccer academies will then only compete against each other on a two-weekly basis in an interprovincial soccer competition during the school terms, with one away and one home game against each opponent, ending with a final between the two top teams.

Summary of the Ministries and their plans as represented by a Deck of cards that will bring peace and prosperity to SA.

Hearts (Governing and Nation Building)

Ace – A plan by the **Minister of Intelligence** to unite all the best current political leaders in South Africa into one simple but very efficient democratic government to rule South Africa better than any country in the world.

King – *The Prime Minister*

Queen – *Minister of Human Resources*

Jack – *The Minister of Basic Education*

Ten – *The Minister Local Governance*

Nine – *The Minister of Health*

Eight – *Minister of Sport/Art/Culture*

Seven – A plan for the **Minister of Human Resources** to inspire all the Government Employees to be proud to be in government and do their work ethically and with enthusiasm in a precise and organised fashion.

Six – A comprehensive plan for the **Minister of Basic Education** to drastically improve the marks of pupils who are underperforming by evaluating and paying the teachers on the results of their pupils in relationship with their inherent potential.

Five – A simple plan for the **Minister of Local Governance** to fix the bad service delivery in cities and towns.

Four – A plan for the **Minister of Sport** to help South Africa win the Soccer World Cup within the next 15 years.

Three – An Airbus helicopter called The Eagle for the Ministers in the cabinet.

Two – Unify Lesotho with South Africa.

Diamonds (Economy and finances)

Ace – A quick plan for the **Prime Minister** to jumpstart the economy to create more employment, by **uniting** the population of South Africa behind the government to **support local products**. The **demand** for more local products will lead to **producing** more local products.

King – *The Minister of Finance*

Queen – *Min of State-owned Enterprises*

Jack – *The Minister of Foreign Affairs*

Ten – A plan for the **Minister of Finance**

to create wealth for the state through the creation of, investment in, and controlling of the value of our own two non-digital stable cryptocurrencies.

Nine – A plan to help the Minister of **State Owned Enterprises** to fix the South African Railways.

Eight – A plan to help the Minister of **Foreign Affairs** to promote South African tourism in the First World through a book about South African Tourism.

Seven – A plan for the Minister of **State Owned Enterprises** to manufacture commercial vehicles with Denel's expertise at its core.

Six – Denel makes a pistol for the police.

Five – A labour-intensive clothing manufacturing business initiated by the

Minister of Higher Education.

Four – A state run courier business.

Three – A plan for the **Ministry of Intelligence** to design and build Nuclear and Hydro Energy Generation Facilities.

Two – A Language Cultural monument to be built at Mapungubwe.

Clubs (Crime Fighting Matters)

Ace – A plan for the **Minister of Correctional Services** to ultimately eliminate crime in South Africa by **rehabilitating** criminals quickly, cheaply and in a most excellent way.

King – *Minister of Correctional Services*

Queen – *The Minister of Police*

Jack – *The Minister of Justice*

Ten – A Plan for the **Minister of Defence** to use the **Army** to build 49 400 new single cell prisons in one year to start rehabilitating existing prisoners.

Nine – A simple plan for the **Minister of Police** to give a monetary reward to citizens who report criminals that are eventually found guilty in court to help the police make more arrests. At the heart of this plan is changes to the unnecessary procedures that make it too difficult for police to arrest criminals.

Eight – A plan for the **Minister of Police** to give an amnesty period for murder to force uncaught murderers to surrender themselves to the police.

Seven – A perfect plan for the **Minister of Justice** to process criminals through the judicial system very quickly without any wrong judgements.

Six – Fire arms licencing done with a competency test at police station.

Five – a Plan for the **Minister of Human Resources** to bring an end to corruption in the state through paid informants.

Four – The Secret Service of the **P.M.**

Three – A Peace plan for Israel

Two – Plans to solve American Drugs, Mass Shooting, Division and State Debt.

Spades (Work related Matters)

Ace – The basis upon which employees are appointed, promoted and monetarily rewarded inside any organization in South Africa.

King – *Minister of Urban Employment*

Queen – *Minister of the SA Army*

Jack – *Minister of Public Works*

Ten – *Minister of Agri/Fish/Rural devel.*

Nine – *Minister of Higher Education*

Eight – A Plan for the **Minister of Urban Employment** to improve or heal the relationship between the employer and employee with shop stewards that visit the workplace with fresh ideas to help workers improve their salaries, productivity and general psychological happiness and informing employers how to be better leaders and bosses.

Seven – A plan for the **Minister of the SA Army** to use the **Army** to do tourism infrastructure development.

Six – A Plan for the **Minister of Public Works** to help her determine the best tender on any project and choose which project to do through a points system.

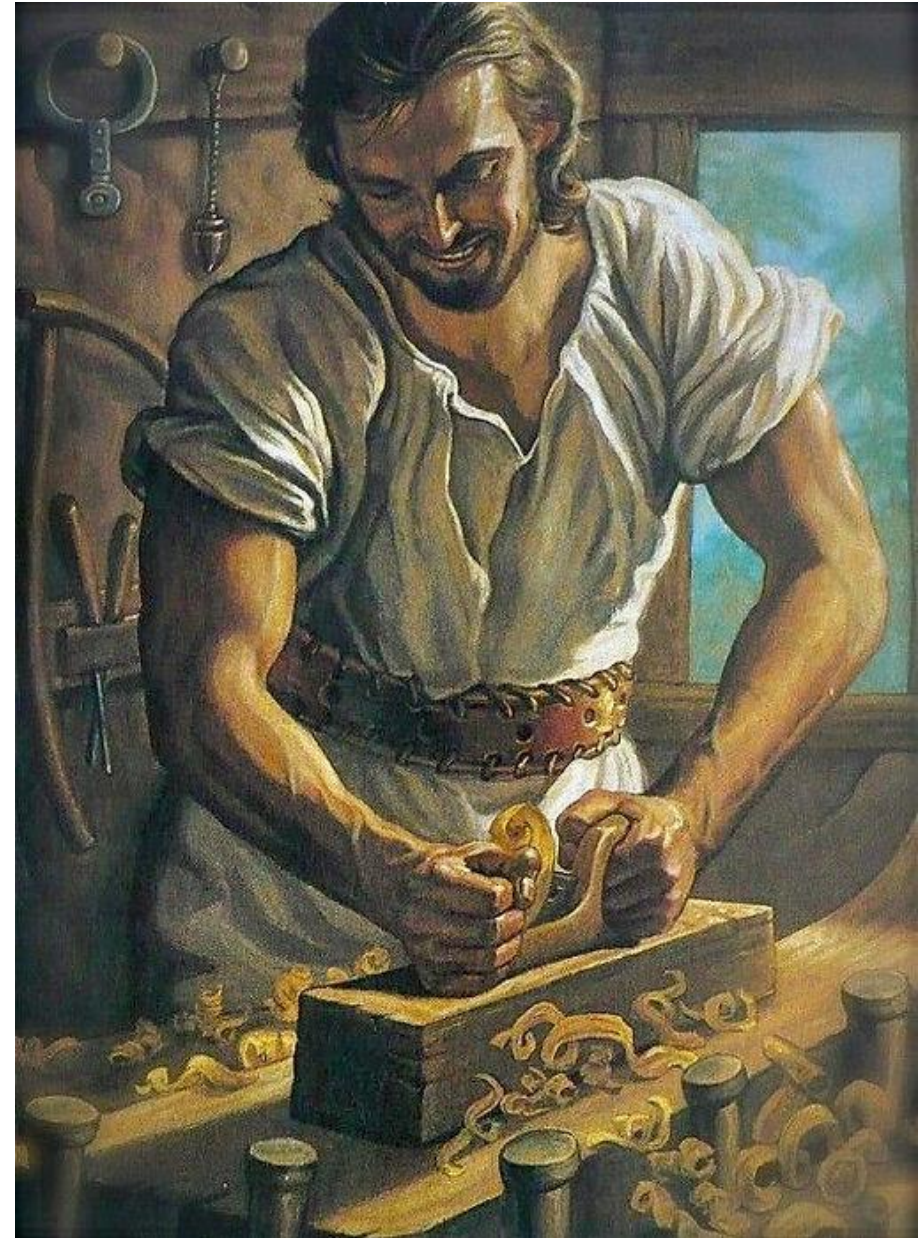

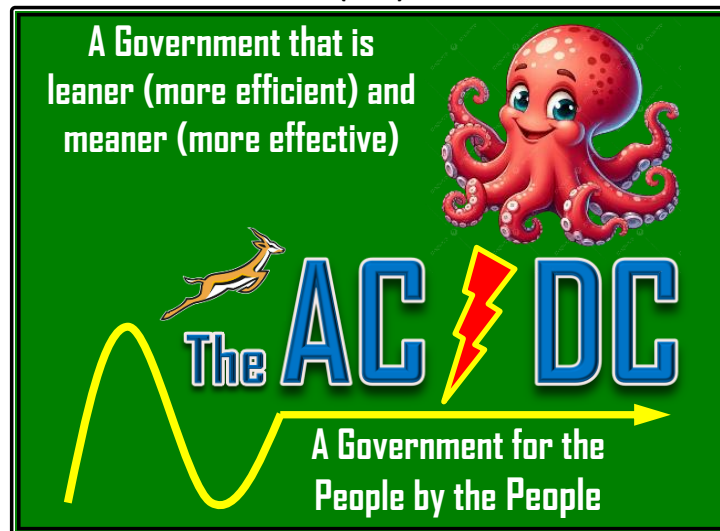

Five – A plan for the **Minister of Agri/Rural Devel.** to use the chiefs to re-organize the former homelands into productive communal farms.

Four – Poor Economic Empowerment plan for the **Minister of Higher Ed.**

Three – Modular concrete structures.

Two – The system by which Advisors of the Ministry of Intelligence and the Citizens of South Africa through writing letters will make a contribution to the decisions taken by the cabinet.

Our **Trump card** is none other than Jesus of Nazareth himself, who is the one that have been helping us to compile the deck of cards and stack it on a website. We will take him along with us into government as our source of wisdom and inspiration. He is the king of heaven and earth. Nobody knows this country, its people and it's problems better than him. He also knows what it will take to turn our boat around and make South Africa a great success story, the envy of the world. South Africa has so much potential, but bad governance has been keeping us back unfortunately. If the people of South Africa vote in the South African Christian Democratic Company our country will improve for the better just as drastically and as quickly then when you switch electricity between Alternate Current (AC) and Direct Current (DC)

South Africa owns two unused submarines bought by Mr Zuma to make a quick buck. The South African Navy under the leadership of the Minister of Defence should repurpose these two magnificent undersea vessels as diving boats with glass windows for tourists to see undersea marine life while living under the water like submariners. An undersea passenger boat like this will command a very expensive ticket price.

Miga 4:3

He shall judge between many peoples, and shall decide disputes for strong nations far away; and they shall beat their swords into plowshares, and their spears into pruning hooks; nation shall not lift up sword against nation, neither shall they learn war anymore;

In the town where I was born
Lived a man who sailed the sea
And he told us of his life
In the land of submarines
So we sailed up to the Sun
Till we found the sea of green
And we live beneath the waves
In our yellow submarine
